INFRAGISTICS Xamarin Forms 16.1 – Service Release Notes – June 2016

One Codebase, Multiple Platforms

Use your current C# and XAML skills to architect your native apps in the same way as traditional cross-platform applications: by using a single codebase. When you combine your talents with our Xamarin.Forms, you're on your way to creating native apps in no time.

What's Changed

Work Item ID	Components	Product Impact	Description
189832	Data Chart	Bug Fix	Illegal Argument Exception when clearing and adding new items to datachart Notes: A scenario where clearing the data assigned to a category date time x axis could cause an error has been resolved.
215806	Data Chart	Bug Fix	Null reference exception when updating data and popping page
218448	Data Chart	Bug Fix	System.NotImplementedException is thrown if LinearGradientBrush is used for a series Brush property. Notes: simple linear gradient brushes have been implemented for Xamarin iOS
213973	Data Chart	Bug Fix	Labels are positioned wrong in category x-axis with rotated and multiline labels. Notes: Adjusted the label rotation logic so it accounts for the individual label height instead of the maximum label height.
217357	Gauges	Bug Fix	Out of memory exception occurs when min and max are very close together.
