

INFRAGISTICS WPF 13.2 – Service Release Notes – October 2014

Raise the Bar on Both BI and Desktop UI with Infragistics WPF Controls

Infragistics WPF controls provide breadth and depth in enabling developers to bring modern, trend-setting applications to market while shortening development time. If you need gesture/touch support, dynamic themes, and lightning fast performance in one WPF package, look no further.

What's New

Component	Feature Name	Descriptions
Excel Library	Hyperlinks Support	Added support for hyperlinks in Excel cells

What's Changed

Component	Feature Name	Descriptions
Common	Bug Fix	In Office2013 theme, checkboxes appear checked when IsEnabled and IsChecked = False.
Common	Improvement	Performance impacting code in CommandSourceManager.RegisterCommandSource
Common	Bug Fix	Source solution for WPF controls cannot compile in VS2012
Common	Bug Fix	ThrottleTimer is spawning tons of threads
Common	Bug Fix	In Office2013 theme, checkboxes appear checked when IsEnabled and IsChecked = False.
Common	Bug Fix	ThrottleTimer is spawning tons of threads
Common	Bug Fix	In Office2013 theme, checkboxes appear checked when IsEnabled and IsChecked = False.
Common	Bug Fix	ThrottleTimer is spawning tons of threads
Control Persistence Framework	Bug Fix	If multiple controls' properties are saved using PersistenceGroup, only the first control's properties can be restored.
Drag & Drop Framework	Bug Fix	Drag events are initialized when there is a WindowsFormsHost control and Unpinned pane
Drag & Drop Framework	Bug Fix	Dragging does not work when closing the window that contains the drag source and drop target
Drag & Drop Framework	Improvement	Records are highlighted as mouse moves over after a record is selected

		Notes: we need to make sure that XamGrid_MouseLeftButtonUp event is fired when the mouse is being captured while CellControl is made draggable through the DragDrop framework
Excel Library	Bug Fix	DisplayText of a cell is incorrect under certain scenarios
Excel Library	Bug Fix	ValidateFileWriteProtectionPassword returns false when xlsx file is used
XamBarcode	Bug Fix	XDimension property does not apply when the control is used as Template for custom control
XamCalendar	Bug Fix	Additional options for the LeadingAndTrailingDatesVisibility in the Properties grid of Visual Studio
XamCalendar	Bug Fix	Resource not found message appears on load
XamCalendar	Bug Fix	Setting WeekNumberVisibility before CurrentMode is throwing ArugmentOutOfRangeException
XamComboEditor	Bug Fix	After two consecutive bindings the SelectedItem does not show Notes: Fixed an issue with binding to the SelectedItem property
XamComboEditor	Bug Fix	All the characters in the combo editor are cleared when commas are continuously entered.
XamComboEditor	Bug Fix	Dropdown is floating around the screen
XamComboEditor	Bug Fix	When NotifyPropertyChange method is called on background thread of object bound to combo, InvalidOperationException is thrown Notes: Fixed an issue in the XamComboEditor where model updates on a background thread were causing InvalidOperationExceptions.
XamComboEditor	Bug Fix	When the drop down is opened when the Metro Theme is applied the drop down is slightly shifted to the right relative to the textbox part of the editor
XamComboEditor & XamMultiColumnCombo	Bug Fix	Dropdown height is not correctly set when MaxDropDownHeight property is set and MetroDark theme is applied
XamComboEditor & XamMultiColumnCombo	Bug Fix	XamComboEditors' background color of the selected text is different in combo and multicolumn combo in Metro themes and 2013 theme

XamComboEditor & XamMultiColumnCombo	Bug Fix	XamComboEditors does not return the caret at the beginning of the text box part when the control loses focus
XamComboEditor & XamMultiColumnCombo	Bug Fix	XamComboEditors' Pointer is different in IG theme when hovering over a selectable combo editor
XamContextMenu	Bug Fix	Command of the XamMenuItem is not executed when its 'StaysOpenOnClick' property is set to "False"
XamContextMenu	Improvement	Previously clicked context menu item remains highlighted when theme is applied Notes: When SubmenuItem is selected and a theme is applied, its IsMouseOver property should be set to false so that XamMenuItem goes to Normal visual state
XamDataChart	Bug Fix	First three label's foreground color is not properly set when MetroDark theme is applied and source is reset Notes: Fixed an issue where Labels were not correct initialized after they were get from inactive state.
XamDataChart	Bug Fix	ValueOverlay disappears in OverviewPlusDetailPane, when you hide and show the series and then zoom in or hover over the OverviewPlusDetailPane. Notes: Fixed an issue where value overlays would not appear in the OPD has been corrected.
XamDataChart	Bug Fix	When the 'ValueMemberPath' contains '.', the series is not shown Notes: A scenario where trying to use an explicit string indexer as a member path would fail has been resolved.
XamDataPresenter	Bug Fix	Additional field layout is generated if there is a field which underlying property is of type byte array
XamDataPresenter	Bug Fix	AddNewRecord is not available for the child field layout if a record has no child records

XamDataPresenter	Bug Fix	Collapsing expanded sub recods after grouping and ungrouping of the parent record takes several clicks
XamDataPresenter	Bug Fix	Convert value error message is not friendly enough
XamDataPresenter	Bug Fix	Dropdown of the combobox is not correctly positioned when the record coming into view
XamDataPresenter	Bug Fix	Fields which have 'Browsable(false)' attribute are not exportable to Excel Notes: Fixed an issue with the DataPresenterExcelExporter in which fields with a Browsable(false) attribute were not being exported.
XamDataPresenter	Bug Fix	Filter cell not wide enough for dropdown button when Field.Width is set to 'Auto' Notes: Fixed an issue by adding public, read-only, inheritable, attached 'Selector' property on ComparisonOperatorSelector so that we could remove 'FindAncestor' bindings used to style the drop down button inside its template. Since FindAncestor bindings are asynchronous this caused the ComparisonOperatorSelector to return a desired size that was too narrow during initialization.
XamDataPresenter	Bug Fix	Filter items are not correct when DateTime source value is edited as string
XamDataPresenter	Bug Fix	Filtering UnboundField and then changing value of filtered out record does not filter in the record
XamDataPresenter	Bug Fix	First visible row resizing when AutoFitMode = ExtendLastField and Text Wrapping is enabled
XamDataPresenter	Bug Fix	ForegroundColor for CellValuePresenter does not work on a date column if IGTheme is applied to the grid.
XamDataPresenter	Improvement	GroupBy performance Notes: Optimized logic to more efficiently process scenarios with a large number of fields when filtering is enabled and grouping is performed.
XamDataPresenter	Improvement	Inconsistent Filtering On # Symbol With Excel Style Filtering

		<p>Notes:</p> <p>Fixed an issue by adding a new property, <code>ExcelStyleFilterSearchOperator</code>, was added to the <code>FieldSettings</code> class to allow controlling how the text entered into the search textbox of the Excel style filter menu is used to filter the list of items in the tree control within the menu. By default it will continue to perform a like operation where one may enter wildcards such as <code>?</code>, <code>*</code> or <code>#</code>.</p>
XamDataPresenter	Bug Fix	Index out of Range Exception is thrown when trying to re-add a Field and <code>AllowRecordFiltering</code> is set to true.
XamDataPresenter	Bug Fix	Multi Cell/Row selection lost when mouse dragged over <code>GroupByRecord</code>
XamDataPresenter	Bug Fix	Null Reference Exception occurs in <code>ShouldIncludeHeaderPeer</code> getter property of <code>ListAutomationPeerHelper</code>
XamDataPresenter	Bug Fix	Some of the rows selected by dragging the row selector can't get an appearance of selected row if <code>RecordContainerGenerationMode</code> is set <code>Virtualize</code> .
XamDataPresenter	Bug Fix	Tabbing to next cell in row causes skipped cells when manually arranging Fields
XamDataPresenter	Bug Fix	<code>TargetInvocationException</code> is thrown cancelling the adding of a new record when using <code>IBindingList</code> collection
XamDataPresenter	Bug Fix	<p>The application is hanging when using semaphore</p> <p>Notes:</p> <p>Fixed an issue with the <code>DataPresenterExcelExporter</code> where it would asynchronously save the workbook file when using the synchronous Export method.</p>
XamDataPresenter	Bug Fix	Two group records are scrolled when <code>SelectionTypeRecord</code> is set to single and partially visible record from the bottom which is not the last one is selected.
XamDataPresenter	Bug Fix	Typing in filter when filter is dropped down deletes input when there are similar entries.
XamDataPresenter	Bug Fix	<p>Value which is bigger than <code>9.9e+27f</code> is not displayed</p> <p>Notes:</p> <p>Very large values now display in scientific notation but when the user enters edit mode the value will still be null because the <code>XamNumericEditor</code> does not support scientific notation.</p>

		<p>In this scenario it is best to use a XamTextEditor instead of a XamNumericEditor inside the CellValuePresenter.</p> <p>This can be specified in a couple of ways. Off the FieldSettings object you can set the 'EditAsType' property to String or register a default editor for floats in code, e.g.:</p> <pre>ValueEditor.RegisterDefaultEditorForType(typeof(float), typeof(XamTextEditor), true);</pre> <p>or</p> <pre>xmlns:sys="clr-namespace:System;assembly=mscorlib" ...</pre> <pre><igWPF:XamDataGrid x:Name="xamDataGrid1"> <igWPF:XamDataGrid.FieldLayouts> <igWPF:FieldLayout> <igWPF:FieldLayout.Fields> <igWPF:Field Name="Marks"> <igWPF:Field.Settings> <igWPF:FieldSettings EditAsType="{x:Type sys:String}"/> </igWPF:Field.Settings> </igWPF:Field> </igWPF:FieldLayout.Fields> </igWPF:FieldLayout> </igWPF:XamDataGrid.FieldLayouts> </igWPF:XamDataGrid></pre>
XamDataPresenter	Bug Fix	Vertical grid lines not aligned with column header dividers in Office2010 theme.
XamDataTree	Bug Fix	Application hangs after changing content to XamDataTree
XamDataTree	Bug Fix	Keyboard navigation should skip the collapsed nodes
XamDataTree	Bug Fix	Null Reference Exception is thrown when you double click on a Node.

XamDialogWindow	Bug Fix	Window size is not set properly when HeaderIconVisibility is set to Hidden or Collapsed in XAML
XamDialogWindow	Bug Fix	XamDialogWindow does not open correctly after closed in MinimizedPanel
XamDockManager	Bug Fix	A ToolWindow may be closed while it is being shown if a COM call is made during the Show.
XamDockManager	Bug Fix	Binding Expression path errors are thrown when applying MetroDark Theme
XamDockManager	Bug Fix	ContentPane is cropped when there is a WindowsFormsHost inside it.
XamFormulaEditor	Bug Fix	Error in the Output when the editor dialog is opened Notes: Fixed some binding errors that occur when first showing the FormulaEditorDialog. They are now binding warnings.
XamGantt	Bug Fix	Switching between timescales moves to beginning of last displayed left-most date value.
XamGantt	Improvement	Width of the grid and chart sections should be available without retemplating the xamGantt. Notes: Fixed an issue by adding GridWidth and ChartWidth properties, of type GridLength, to the xamGantt so one can get/set the width of the sections. The default xaml has been updated to two-way bind the Width of the corresponding ColumnDefinition in the template of the xamGantt.
XamGrid	Bug Fix	Cannot add Rows, when there are no Rows in the bounded DataTable
XamGrid	Bug Fix	Cannot group column when window size increased while inside ViewBox.
XamGrid	Bug Fix	Checkbox in filter menu does not reflect the filter result
XamGrid	Bug Fix	ComboBoxColumn doesn't show selected value, when EditorDisplayBehavior is set to EditMode
XamGrid	Bug Fix	ConditionalFormatting not applied when StyleToApply set the Template of the ConditionalFormattingCellControl
XamGrid	Bug Fix	DateTimeColumn doesn't enter in edit mode when using Tab
XamGrid	Bug Fix	EditingSettingsOverride for column layout does not work if EditingSettings is set to Hover
XamGrid	Bug Fix	Grouping in ICollectionView causes NullReferenceException

XamGrid	Bug Fix	In IgTheme, calendar in the grid changes its width when hover over today date
XamGrid	Bug Fix	In Office2010Blue theme, resizing indicator is very pale and differs from any other theme's indicator color
XamGrid	Bug Fix	Invalid Operation Exception when opening filter menu of XamGrid created by different thread
XamGrid	Bug Fix	Null Reference Exception is thrown when clearing filter through the clear filter button after ungrouping
XamGrid	Bug Fix	Previously hidden columns remain in edit mode when allow editing is set to "Row."
XamGrid	Bug Fix	When in ViewBox you can drop Columns outside and they are still grouped.
XamInputs	Bug Fix	ContextMenu commands work when IsEnabled is set to False. Notes: Fixed an issue in the XamMaskedInput where certain context menu items were enabled when the control was disabled.
XamInputs	Bug Fix	Error message shown when entering a value > 1000 with ValueTypeName as nullable Decimal or Double Notes: Fixed an issue in the XamMaskedInput where setting the value type to a nullable type may cause validation errors to occur incorrectly.
XamInputs	Bug Fix	Input controls are not handling Space when hosted in XamRibbonWindow Backstage menu
XamInputs	Bug Fix	Required field validation doesn't work if the characters in the editor is removed one by one. Notes: Fixed an issue in the ValidationDecorator where the validation error information might get removed while editing the value even if the value is invalid.
XamInputs	Bug Fix	Value is not modified properly if the digit on the left of a comma is selected with mouse and changed
XamInputs	Bug Fix	When IsEnabled is set to false the control doesn't blur.

XamLinearGauge	Bug Fix	NeedleContainsPoint method does not recognize when the mouse is over the needle, if title of the control is set Notes: Fixed an issue where adding titles to the gauges no longer disrupts NeedleContainsPoint and GetValueForPoint methods.
XamMultiColumnCombo	Bug Fix	Highlighting does not work as expected when FilterMode is set to FilterOnPrimaryColumnOnly
XamMultiColumnCombo	Bug Fix	Items displayed in editor do not include all properties of underlying class.
XamMultiColumnCombo	Bug Fix	ITypedList interface not respecting GetItemProperties() in editor dropdown.
XamOutlookBar	Bug Fix	Several OutlookBar themes are not thread safe
XamPivotGrid	Bug Fix	Edit textbox doesn't expand when resize column Notes: The fix actually exits edit mode on this particular MouseLeftButtonDown, as it is done in the XamPivotGrid class' same event handler.
XamPivotGrid	Bug Fix	PivotDataSlicerItem selected background visible in IG and Office2010Blue Themes when not deselected
XamPivotGrid	Bug Fix	PivotGrid performance when loading cube data
XamRadialMenu	Bug Fix	NumericItem in RadialMenuList is missing top padding in all themes
XamRibbon	Bug Fix	ButtonTool in ApplicationMenu cannot be hidden using ToolTipService.SetIsEnabled
XamRibbon	Bug Fix	ButtonTool style is not being retained when added to QAT
XamRibbon	Bug Fix	Missing key error is thrown at design time even when the key of GalleryTool is set
XamRibbon	Bug Fix	Selected combo tool item is not visible in IG theme
XamRichTextEditor	Bug Fix	After ToggleNumbering command is called when the list indicators are selected then the selection is moved to the first characters after the indicators Notes: Fixed an issue when toggling bullets/numbering off for list items where the associated list

		<p>indicators are selected when the toggling is performed. In this scenario the selection would persist on the text following the list indicators after the list indicators were removed by the toggle operation. With this fix, the selection is now cleared.</p>
XamRichTextEditor	Bug Fix	<p>An empty row is added after the newly inserted nested table which disappears on leaving the cell.</p> <p>Notes: Fixed an issue in the XamRichTextEditor where the Caret position after inserting a table from the UI (i.e., from the built-in ContextMenu or the InsertTableDialog) was incorrect. Previously that Caret was positioned immediately after the newly inserted table - now the Caret is correctly positioned in the first cell of the newly inserted table.</p>
XamRichTextEditor	Bug Fix	<p>An exception is thrown when applying Metro and MetroDark themes on RTE placed in a tab item.</p>
XamRichTextEditor	Bug Fix	<p>Changing the text of one of the selection ranges that is not the last item, throws an exception</p> <p>Notes: Fixed an issue in the RichTextEditor which could cause a Null Reference Exception to be raised when setting the text on one of the Ranges in a multiple selection scenario.</p>
XamRichTextEditor	Bug Fix	<p>Characters are positioned below the first one when subscript and small caps are applied</p>
XamRichTextEditor	Bug Fix	<p>ClearCharacterStyle is removing letters</p>
XamRichTextEditor	Bug Fix	<p>Double underline style is visualized as a thick underline</p> <p>Notes: Resolved an issue in the RichTextEditor when running on 96 DPI systems where double underlines were rendered as a single thick underline.</p>
XamRichTextEditor	Bug Fix	<p>Down navigation is not showing the whole line</p> <p>Notes:</p>

		Fixed an issue which sometimes caused the last visible line in the display to be slightly clipped when navigating between lines.
XamRichTextEditor	Bug Fix	<p>End-of-row marks of inner tables are displayed in neighbor cells of the parent table.</p> <p>Notes: Fixed a layout error in xamRichTextEditor that caused the 'end of content marker' (i.e., the '␣' character) displayed at the end of content in table cells and rows to be displayed a little too far to the right. This problem only occurred in Silverlight and was most noticeable when rendering end-of-row markers for a table nested within a parent table cell.</p>
XamRichTextEditor	Bug Fix	Full-width digits are not correctly saved at RTF format
XamRichTextEditor	Improvement	<p>IncreaseIndentLevel command invoked on the first list item is not indenting the whole list</p> <p>Notes: Added support for new commands on the XamRichTextEditor control:</p> <p>IncreaseListIndentLevel and DecreaseListIndentLevel for changing the indent level of the entire list (if any) that contains the current selection start</p> <p>IncreaseParagraphOrListIndentLevel and DecreaseParagraphOrListIndentLevel to modify the indent level of the entire list if the selection start is in the first paragraph of a list or modify only the paragraph containing the selection start if the selection start is in a 2nd or subsequent list paragraph.</p>
XamRichTextEditor	Bug Fix	<p>IncreaseIndentLevel is not undoable</p> <p>Notes: Fixed an issue which prevented undo/redo from working when indenting and outdenting paragraphs.</p>
XamRichTextEditor	Bug Fix	<p>MemoryLeak when the editor is placed in a windows and it closes</p> <p>Notes:</p>

		Fixed an issue in the XamRichTextEditor that would sometimes cause a small memory leak after dismissing a sub form containing a XamRichTextEditor.
XamRichTextEditor	Bug Fix	Paragraph mark is not automatically selected when selecting whole paragraph with the list indicator Notes: Fixed an issue in the XamRichTextEditor where selecting all the text in a bullet from right to left using the mouse would select then deselect the paragraph mark. It now leaves the paragraph mark selected.
XamRichTextEditor	Bug Fix	Pressing Tab at the beginning of a paragraph is not indenting it Notes: Fixed an issue in the XamRichTextEditor which resulted in an incorrect caret position after indenting a paragraph by pressing the TAB key when positioned at the beginning of the second or subsequent line of the paragraph.
XamRichTextEditor	Bug Fix	Selection ToggleBulletFormatting and ToggleNumberFormatting is working for the first paragraph only
XamRichTextEditor	Bug Fix	Setting new text of an existing hyperlink is causing some issues
XamRichTextEditor	Bug Fix	Some of the Roman list indicators cannot be selected by mouse click or keyboard
XamRichTextEditor	Bug Fix	Tab is not working properly when 2 or more paragraphs are added Notes: Fixed an issue where pressing the tab key at the before the first character in a paragraph with leading tabs resulted in the paragraph being indented rather than a tab being inserted.
XamRichTextEditor	Bug Fix	Tab mark is visualized as a square instead of arrow when bullets are used
XamRichTextEditor	Bug Fix	Tab mark shouldn't pick up any character setting
XamRichTextEditor	Bug Fix	Tables' outer borders are missing in the exported .rtf file when the document is imported using docx.
XamRichTextEditor	Bug Fix	ToggleBullets command is not removing any kind of ListIndicator but just Bullets

		<p>Notes: Fixed an issue that occurred when executing the XamRichTextEditor ToggleBullets and ToggleNumbering commands where only the 'Bullet' and 'Decimal' styles were being correctly toggled 'off'. Other styles were being set to the 'Bullet' or 'Decimal' style instead of being toggled off.</p>
XamRichTextEditor	Bug Fix	Underline and strikethrough lines are not drawn properly.
XamRichTextEditor	Bug Fix	<p>Undo is not able after a ToggleNumbering command is invoked on the first paragraph</p> <p>Notes: Fixed an issue in the XamRichTextEditor which prevented the Undo after toggling bullets/numbering on a list.</p>
XamRichTextEditor	Bug Fix	<p>Vertical resize splitter is displayed with a little offset from the actual border.</p> <p>Notes: Fixed an issue in the XamRichTextEditor that occurred when resizing table columns where the vertical resize splitter was sometimes positioned with a slight offset from the cell border it was resizing.</p>
XamSchedule	Bug Fix	Application hangs if there is a recurrence appointment with DayOfMonthRecurrenceRule whose DayOfMonth is set to a negative number.
XamSchedule	Bug Fix	Appointments not released from memory.
XamSchedule	Bug Fix	Argument Exception is thrown when a ResourceCalendar is removed from DataConnector's ResourceCalendarItemsSource collection.
XamSchedule	Bug Fix	<p>Description for the recurrence day-months setting is incorrect/opposite</p> <p>Notes: Modified the XamSchedule Recurring Appointment Dialog to match the functionality of the 'Monthly Recurrence Pattern' section with the Japanese localization. In order to apply the fix, the InfragisticsWPF4.Controls.Schedules.v1*.*.resources satellite assembly must be updated in the GAC. This can be done by command prompt after installing the service release. For example (13.2, Windows 7 32-bit):</p>

		<pre>cd "C:\Program Files\Infragistics\2013.2\WPF\CLR4.0\Bin\ja" "C:\Program Files\Microsoft SDKs\Windows\v7.0A\bin\NETFX 4.0 Tools\gacutil.exe" /i "InfragisticsWPF4.Controls.Schedules.v13.2.resources.dll"</pre>
XamSchedule	Bug Fix	In MetroDark theme, 15 minutes activities are not visualized properly
XamSlider	Bug Fix	Slider buttons in Office 2013 theme do not reflect correction action when IsDirectionReversed = true
XamSlider	Bug Fix	Thumbs cannot be moved, when placed at the minimum value and InteractionMode property is set to Lock
XamSpellChecker	Bug Fix	Argument Null Exception when spellchecker inside a ViewBox
XamSpreadSheet	Bug Fix	Diagonal border lines of the cells are rendered in the opposite direction.
XamSpreadSheet	Bug Fix	Wrong cell is activated when loading an existing named reference containing multiple selected ranges.
XamSpreadSheet	Bug Fix	Single click and typing does not automatically enter edit mode when using IME
XamSpreadSheet	Bug Fix	Setting cell's font is not visually updated.
XamSpreadSheet	Bug Fix	Superscript in xamSpreadsheet is not rendered properly
XamSpreadSheet	Bug Fix	Incorrect cell references after pasting a formula in a cell where the formula should result in an error.
XamSpreadSheet	Bug Fix	ToggleSuperscript and ToggleSubscript routed commands don't update the xamSpreadsheet cell.
XamSpreadSheet	Bug Fix	SpreadSheet has the line is still visible in the cell after the removal of the underline
XamSpreadSheet	Bug Fix	SpreadSheet has incorrect underlining of the selected cell's content
XamSpreadSheet	Bug Fix	SpreadSheet has incorrect Button mode
XamSyntaxEditor	Bug Fix	<p>Null Reference Exception is thrown when selecting the typed text if the 'Visibility' of the EditorDocumentViewScrollBarArea is set to "Collapsed"</p> <p>Notes: Fixed an issue in the XamSyntaxEditor which resulted in a NullReferenceException when a custom style was supplied for the EditorDocumentViewScrollBarArea which set the Visibility of the ScrollBars to Collapsed.</p>

XamTileManager	Bug Fix	Maximized tile not released from memory after removal from UI.
XamTileManager	Bug Fix	Tiles not released from memory after close.
XamTileManager	Improvement	<p>XamDataGrid in tile jumps when grid in another tile is refreshed</p> <p>Notes: This was not a bug. It had to do with an interaction between the logic used to fill the available space in the xamDataGrid and the xamTileManager layout logic.</p> <p>We added a property to control this behavior to GridViewSettings called 'AllowLastRecordScrollToTop'. It defaults to false but if set to true will prevent the attempt to fill available space with records.</p> <p>For example to set this proeprty in xaml :</p> <pre><igWPF:XamDataGrid> <igWPF:XamDataGrid.ViewSettings> <igWPF:GridViewSettings AllowLastRecordScrollToTop="True"/> </igWPF:XamDataGrid.ViewSettings> </igWPF:XamDataGrid></pre>
