

NetAdvantage[®] Reporting 2011.2 (build 2109) – Service Release Notes – August 2012

Use NetAdvantage Reporting, the industry's first WPF and Silverlight-based design-time and rendering reporting tool, to create elegant and easy-to-design reports engineered to help you deliver information to your users in the shortest time possible —without the need for legacy code.

Release Notes

Component	Product Impact	Description
Designer	Bug Fix	MySQL Data Source configuration issue fixed. You can now configure a SQL Data Source to retrieve data from a MySQL database.
Viewers	Bug Fix	Server connection error details issue fixed. Working on server-side, when server connection errors occur on the client-side, error handling was improved and messages now include exception details.
Viewer API	Breaking Change (API)	Print Dialog window display behavior issue fixed. When printing programmatically without displaying the dialog, if the print settings provided by the user produce conflicts with the printer driver, conflicts will be resolved automatically and the Print Dialog window is no longer displayed. New methods were added to the WPF and WinForms Viewers to control whether to display the Print Dialog window when there is a conflict.
