

NetAdvantage[®] Reporting 2011.2 (build 2153) – Service Release Notes – January 2013

Use NetAdvantage Reporting, the industry's first WPF and Silverlight-based design-time and rendering reporting tool, to create elegant and easy-to-design reports engineered to help you deliver information to your users in the shortest time possible —without the need for legacy code.

Release Notes

Component	Product Impact	Description
IDE	Bug Fix	SQL Server Compact Edition issue fixed. It is now possible to configure a SQL Data Source to retrieve data from a SQL Server Compact Edition database. For further details refer to the section below.

Service Release Notes Reference

Using SQL Server Compact Edition	<p>The default provider (<i>Microsoft.SqlServerCe.Client.<Version></i>) does not work with SQL Server Compact Edition connections. You must use <i>System.Data.SqlServerCe.<Version></i> instead.</p> <p>When creating the connection, you are prompted to change the default Provider. You can choose to change it through the wizard, or manually, modifying the App.Config file.</p> <p>After changing the provider, you need to rebuild the project in order to use the new Provider.</p> <p>Notice that connections created for the recommended provider are not displayed in the connections combo box of the Data Source Wizard.</p>
