

Infragistics Reporting 2014.2 (build 1025)

Release Notes – June 2015

Use Reporting, the industry's first WPF and Silverlight-based design-time and rendering reporting tool, to create elegant and easy-to-design reports engineered to help you deliver information to your users in the shortest time possible —without the need for legacy code.

Installation

Downloading	Download Reporting here.						
Notes	<p>Reporting does not support side-by-side installations. Depending on the installation form of your choice, an additional step may be required:</p> <table border="1" data-bbox="467 596 1430 1171"> <thead> <tr> <th data-bbox="467 596 781 680">Installing through...</th> <th data-bbox="781 596 1430 680">Description</th> </tr> </thead> <tbody> <tr> <td data-bbox="467 680 781 961">Platform Installer</td> <td data-bbox="781 680 1430 961">When installing Reporting 2013 Volume 2 through the Platform Installer (self-extracting wrapper) and having a previous Reporting release already installed, it will upgrade your previous installation to 13.2.</td> </tr> <tr> <td data-bbox="467 961 781 1171">Stand-alone installer</td> <td data-bbox="781 961 1430 1171">When installing Reporting using the stand-alone installer you will have to manually uninstall a previous version before installing 13.2.</td> </tr> </tbody> </table>	Installing through...	Description	Platform Installer	When installing Reporting 2013 Volume 2 through the Platform Installer (self-extracting wrapper) and having a previous Reporting release already installed, it will upgrade your previous installation to 13.2.	Stand-alone installer	When installing Reporting using the stand-alone installer you will have to manually uninstall a previous version before installing 13.2.
Installing through...	Description						
Platform Installer	When installing Reporting 2013 Volume 2 through the Platform Installer (self-extracting wrapper) and having a previous Reporting release already installed, it will upgrade your previous installation to 13.2.						
Stand-alone installer	When installing Reporting using the stand-alone installer you will have to manually uninstall a previous version before installing 13.2.						
Sample Browser	<p>Requirements</p> <ul style="list-style-type: none"> • RIA Services must be installed. • SQL Express is required by default, if not available you may configure or use an alternate connection string defined in the Web.Config file. 						

Bug Fixes

Component	Product Impact	Description
Infragistics Reporting (Designer)	Bug Fix	Non-generic Font family validation issue fixed When working with a non-generic Font family, now a default font is applied.
Infragistics Reporting (Viewer)	Bug Fix	“Fit to Width” functionality issue fixed You can now click “Fit to Width” after resizing the viewer and it works as expected.
Infragistics Reporting (Designer)	Bug Fix	VB Service host template issue fixed When adding a Reporting Service host template in a VB project, now the template is generated correctly.
Infragistics Reporting (Printing)	Bug Fix	Report page settings prompt issue fixed The report’s page settings now take precedence over the printer settings.
Infragistics Reporting (Export)	Bug Fix	Excel with extra spaces between sections issue fixed. Non visible sections in the Report are no longer exported to Excel.
Infragistics Reporting (Viewer)	Bug Fix	Export to XPS with Japanese fonts issue fixed When exporting to PDF and including Japanese fonts that are not installed in the server running the report, the performance is no longer an issue.
Infragistics Reporting (Viewer)	Bug Fix	Repeater’s table summaries always displayed issue fixed In Tables with collection repeaters, you can now choose whether to show or hide the repeater’s table summaries when there are no rows.
