

# INFRAGISTICS Xamarin Forms 15.1 – Service Release Notes – March 2016

## One Codebase, Multiple Platforms

Use your current C# and XAML skills to architect your native apps in the same way as traditional cross-platform applications: by using a single codebase. When you combine your talents with our Xamarin.Forms, you're on your way to creating native apps in no time.

## Installation

|                    |  |
|--------------------|--|
| <b>Downloading</b> | <a href="#">Download Infragistics Controls for Xamarin Forms here.</a> |
|--------------------|--|

## What's Changed

| Components   | Product Impact | Description   |
|--------------|----------------|---|
| Data Chart   | Bug Fix        | [XF - Android] Using Xamarin.Forms.Device.InvokeOnMainThread to update chart misaligns the labels of the chart.<br><br>Notes:<br>A scenario where updates to axis labels could sometimes result in the labels winding up misaligned as been resolved. |
| Linear Gauge | Bug Fix        | Binding context of the XFLinearGauge not being propagated to the LinearGraphRange<br><br>Notes:<br>Binding context inheritance has been fixed for the gauge ranges.   |
| Showcases    | Improvement    | [XF - Financial App - Android] "Search" button is not displayed/scaled properly   |
| Showcases    | Bug Fix        | [XF - Financial App - Android] Selecting different tab after adding new company cause System.ArgumentException: 'object' must not be IntPtr.Zero  |
| Showcases    | Improvement    | [XF - Finance App - iOS] title and search not properly displayed on iPhone6 simulator   |
