

INFRAGISTICS Xamarin Forms 15.2 – Service Release Notes – March 2016

One Codebase, Multiple Platforms

Use your current C# and XAML skills to architect your native apps in the same way as traditional cross-platform applications: by using a single codebase. When you combine your talents with our Xamarin.Forms, you're on your way to creating native apps in no time.

Installation

Downloading	Download Infragistics Controls for Xamarin Forms here.
--------------------	--

What's Changed

Components	Product Impact	Description
Data Chart	Bug Fix	[XF - Android] Using Xamarin.Forms.Device.InvokeOnMainThread to update chart misaligns the labels of the chart. Notes: A scenario where updates to axis labels could sometimes result in the labels winding up misaligned has been resolved.
Linear Gauge	Bug Fix	Binding context of the XFLinearGauge not being propagated to the LinearGraphRange Notes: Binding context inheritance has been fixed for the gauge ranges.
Showcases	Improvement	[XF - Financial App - Android] "Search" button is not displayed/scaled properly
Showcases	Bug Fix	[XF - Global Sales - Android] Selection of month, quarter, year is not respected when chart is displayed
