# Release Notes

| Component | Product Impact | Description |
|---|---|---|
| **WebDataGrid** | Bug Fix | Cell alignment is broken in IE6/Windows XP. NOTE: The initial rendering issue is fixed. When you resize and if you resize fast the misalignment still happens because of slow JavaScript performance in IE 6. |
| **WebDataGrid** | Bug Fix | Cannot scroll down in Chrome browser when the browser's zoom level is 90% |
| **WebDataGrid** | Bug Fix | Grid performance degrades exponentially as more columns are added. |
| **WebDataGrid** | Bug Fix | InvalidCastException using DropDownProvider for nullable Guide column |
| **WebDataGrid** | Bug Fix | Resizing columns fails intermittently in Internet Explorer |
| **WebDataGrid** | Bug Fix | RowAdding server side event not firing after setting the Bound/Unboundfield value on RowAdded client-side event |
| **WebDataGrid** | Bug Fix | Textbox in the footer template cannot take focus in Firefox/Chrome and cannot select part of the text in IE |
| **WebDataGrid** | Bug Fix | Excel style filtering does not get cleared after calling ClearDataSource |
| **WebDataGrid** | Bug Fix | Dropdown list disappears in IE8 when control is placed in absolutely-position div. |

| | | |
|---|---|---|
| **WebDataGrid** | Bug Fix | WebDataGrid checkboxes are editable, when cell editing is disabled |
| **WebDataGrid** | Bug Fix | CellValueChanged client event does not fire for AddRow. Note:<br>The application should process AddNewRowClientEvents, but not EditingClientEvents. All events for checkboxes were implemented in a similar way as for normal editors.<br>Notes about eventArgs:<br>The Entering/ExitingEditMode supports set_cancel(true).<br>The getEditor() within Entered/ExitedEditMode returns reference to IMG html element, but not cell-editor.<br>The get_displayText() within EnteringEditMode can return: 0(false), 1 (true), 2(undefined). The get/set_displayText() within ExitingEditMode can support only true/false.<br>The getCell() can be used to get reference to column/index by getCell().get_index() or getCell().get_column().get_index() |
| **WebDataGrid** | Bug Fix | Unbound checkboxes in group field throw an exception when filtering |
| **WebDataGrid** | Bug Fix | EditModeActions are triggered by Filter Row |
| **WebDataGrid** | Bug Fix | With no rows existing in the datasource, when adding a row with BatchUpdating enabled, you cannot select or double click the RowSelector for the newly added row |
| **WebDataGrid** | Bug Fix | Removing behavior using the RemoveAt(index) method throws error |
| **WebDataGrid** | Bug Fix | Sorting does not work on unbound column when paging is enabled |
| **WebDataMenu** | Bug Fix | Focus moves to item underneath the submenu on tapping an item. |
| **WebDataMenu** | | Page loads again even when we cancel itemclick event |
| **WebDataMenu** | Bug Fix | NavigateUrl does not open the page in mobile devices. |
| **WebDataMenu** | Bug Fix | Not implemented error occurs when displaying the WebDataMenu as context menu to a WebDataGrid in IE8. |
| **WebDataMenu** | | Navigate URL does not work for child nodes on iPad/iPhone |

| WebDataTree | Bug Fix | WebDataTree is failing 508 Standards, Section 1194.22 (a) rule 1.1.2., as there is a hidden input rendered without an alt attribute. |
|---|---|---|
| WebDataTree | Bug Fix | NodeClick server-side event is not executed if the control is placed on Master page. |
| WebDataTree | Bug Fix | Node editing fails with an "input.parentNode is null" exception when attempting to edit the children of an edited parent with load on demand enabled. |
| WebDataTree | Bug Fix | When node is added client-side, it is not displayed until an additional postback occurs |
| WebDataTree | Bug Fix | Adding child node of newly created node throws exception when CheckBoxMode=Off |
| WebDateTimeEditor | Bug Fix | When having a format of HH:mm entering a value of 60 for the minutes clears the value. Note: Bug was regarding the ability to enter illegal value of 60 for minute and second fields. |
| WebDayView | Bug Fix | The control is resized on any smart callback when AppStyling is enabled and the control is in an HTML table. |
| WebDialogWindow | Bug Fix | Disappearing Scroll Bar after using Dialog Window |
| WebDropDown | Bug Fix | DropDownContainer is not aligned with the drop down button when DropDownContainerWidth is zero or not set and Width is percentage based |
| WebDropDown | Bug Fix | SelectedValue is not updated when the event trigger button is inside UpdatePanel |
| WebDropDown | | The drop down is closing on blur when EnableClosingDropDownOnBlur="False" |
| WebDropDown | Bug Fix | WebDropDown raises multiple Blur events |
| WebDropDown | Bug Fix | WebDropDown has empty value for 'SelectedValue' during postback and when EnableViewState=false |
| WebDropDown | Bug Fix | The client-side Blur event is fired for all WebDropDowns on the page. |
| WebDropDown | Bug Fix | The hovered item is not highlighted on subsequent selection after the first committed selection |
| WebExcelExporter | Bug Fix | When exporting grid to excel, the cell width cuts off text when that text is in Korean. |

| WebExcelExporter | Bug Fix | CellExported eventargs.IsFooterCell does not return true for an exported footer cell |
|---|---|---|
| WebExplorerBar | Bug Fix | Server-side event handlers are not fired for any controls placed in a user control which is dynamically created for an explorer bar item or group. |
| WebExplorerBar | Bug Fix | Items set as selected at design time, in the WebExplorerBar remain selected even after selecting another item. |
| WebExplorerBar | Bug Fix | WebDropDown used as ItemTemplate does not work with control and dropdown does not open |
| WebHierarchicalDataGrid | Bug Fix | Exception "Object does not support this property" with column moving behavior used and it freezes the entire screen when the debug mode of compilation as false in web.config file |
| WebHierarchicalDataGrid | Bug Fix | Cannot add new row to child band via the row adding behavior. |
| WebHierarchicalDataGrid | Bug Fix | Columns shrink after async postback in IE8. Note: That failure of layout happens due to bugs in IE8. For some reason the width/offsetWidth of TBODY of TABLE becomes much smaller than width of its TABLE. The fix includes temporarily hiding and showing TABLE containing grid-data. That might trigger flickering, but that is not possible to fix. |
| WebSchedule | Bug Fix | Multiday appointments on client are multiplied by number of days |

INFRAGISTICS
DESIGN / DEVELOP / EXPERIENCE

| WebSpellChecker | Bug Fix | WebSpellChecker unable to check multiple text boxes due to checkSpelling() function modifications. Note: Logic was improved and restriction for combination of 2nd and 3rd parameters in checkSpelling(...) was removed. Now application may pass both parameters and you should not use explicit update of target field. Example:<br><br>```javascript
function CheckSpelling(index) {
  currentIndex = index;
  if (currentIndex < controls.length) {
    var id = controls[currentIndex];
    var func = function() {
        setTimeout(function() { CheckSpelling(++currentIndex); }, 0);
      };
      owpcChecker.checkSpelling($get(id).value, func, id);
    } else {
      alert("Spell check is complete.");
    }
}
``` |
| **WebSplitter** | Bug Fix | Splitter fails to process mouse |
| **WebTab** | Bug Fix | WebTab control has an accessibility validation issue |
