## Release Notes

Component	Product Impact	Description
Visual Studio Integration	Bug Fix	Several ASP.NET 4.5 assemblies are not available in Visual Studio 2012's Reference Manager
WebDataGrid	Bug Fix	Button Reset Data retrieves the original data the second time when clicked
WebDataGrid	Bug Fix	Cell alignment is broken in IE6/Windows XP. NOTE: The initial rendering issue is fixed. When you resize and if you resize fast the misalignment still happens because of slow performance in IE 6.
WebDataGrid	Bug Fix	Cannot scroll down in Chrome browser when the browser's zoom level is 90%
WebDataGrid	Bug Fix	Grid performance degrades exponentially as more columns are added.
WebDataGrid	Bug Fix	InvalidCastException using DropDownProvider for nullable Guide column
WebDataGrid	Bug Fix	Resizing columns fails intermittently in Internet Explorer
WebDataGrid	Bug Fix	RowAdding server side event not firing after setting the Bound/Unboundfield value on RowAdded client-side event
WebDataGrid	Bug Fix	Textbox in the footer template cannot take focus in Firefox/Chrome and cannot select part of the text in IE
WebDataGrid	Bug Fix	Excel style filtering does not get cleared after calling ClearDataSource
WebDataGrid	Bug Fix	Dropdown list disappears in IE8 when control is placed in absolutely-position div.
WebDataGrid	Bug Fix	WebDataGrid checkboxes are editable, when cell editing is disabled

<b>WebDataGrid</b>	Bug Fix	CellValueChanged client event does not fire for AddRow. Note: The application should process AddNewRowClientEvents, but not EditingClientEvents. All events for checkboxes were im a similar way as for normal editors. Notes about eventArgs: The Entering/ExitingEditMode supports set_cancel(true). The getEditor() within Entered/ExitedEditMode returns reference to IMG html element, but not cell-editor. The get_displayText() within EnteringEditMode can return: 0(false), 1 (true), 2(undefined). The get/set_displayText() wit can support only true/false. The getCell() can be used to get reference to column/index by getCell().get_index() or getCell().get_column().get_index()
<b>WebDataGrid</b>	Bug Fix	Unbound checkboxes in group field throw an exception when filtering
<b>WebDataGrid</b>	Bug Fix	EditModeActions are triggered by Filter Row
<b>WebDataGrid</b>	Bug Fix	With no rows existing in the datasource, when adding a row with BatchUpdating enabled, you cannot select or double cl for the newly added row
<b>WebDataGrid</b>	Bug Fix	Removing behavior using the RemoveAt(index) method throws error
<b>WebDataGrid</b>	Bug Fix	Sorting does not work on unbound column when paging is enabled
<b>WebDataMenu</b>	Bug Fix	Focus moves to item underneath the submenu on tapping an item.
<b>WebDataMenu</b>		Page loads again even when we cancel itemclick event
<b>WebDataMenu</b>	Bug Fix	NavigateUrl does not open the page in mobile devices.
<b>WebDataMenu</b>	Bug Fix	Not implemented error occurs when displaying the WebDataMenu as context menu to a WebDataGrid in IE8.
<b>WebDataMenu</b>		Navigate URL does not work for child nodes on iPad/iPhone
<b>WebDataTree</b>	Bug Fix	WebDataTree is failing 508 Standards, Section 1194.22 (a) rule 1.1.2., as there is a hidden input rendered without an alt
<b>WebDataTree</b>	Bug Fix	NodeClick server-side event is not executed if the control is placed on Master page.
<b>WebDataTree</b>	Bug Fix	Node editing fails with an "input.parentNode is null" exception when attempting to edit the children of an edited parent demand enabled.
<b>WebDataTree</b>	Bug Fix	When node is added client-side, it is not displayed until an additional postback occurs
<b>WebDataTree</b>	Bug Fix	Adding child node of newly created node throws exception when CheckBoxMode=Off

<b>WebDateTimeEditor</b>	Bug Fix	When having a format of HH:mm entering a value of 60 for the minutes clears the value. Note: Bug was regarding the ab value of 60 for minute and second fields.
<b>WebDayView</b>	Bug Fix	The control is resized on any smart callback when AppStyling is enabled and the control is in an HTML table.
<b>WebDialogWindow</b>	Bug Fix	Disappearing Scroll Bar after using Dialog Window
<b>WebDropDown</b>	Bug Fix	DropDownContainer is not aligned with the drop down button when DropDownContainerWidth is zero or not set and W based
<b>WebDropDown</b>	Bug Fix	SelectedValue is not updated when the event trigger button is inside UpdatePanel
<b>WebDropDown</b>		The drop down is closing on blur when EnableClosingDropDownOnBlur="False"
<b>WebDropDown</b>	Bug Fix	WebDropDown raises multiple Blur events
<b>WebDropDown</b>	Bug Fix	WebDropDown has empty value for 'SelectedValue' during postback and when EnableViewState=false
<b>WebDropDown</b>	Bug Fix	The client-side Blur event is fired for all WebDropDowns on the page.
<b>WebDropDown</b>		The selected item is not highlighted on subsequent selection after the first committed selection
<b>WebDropDown</b>	Bug Fix	The hovered item is not highlighted on subsequent selection after the first committed selection
<b>WebExcelExporter</b>	Bug Fix	When exporting grid to excel, the cell width cuts off text when that text is in Korean.
<b>WebExcelExporter</b>	Bug Fix	CellExported eventargs.IsFooterCell does not return true for an exported footer cell
<b>WebExplorerBar</b>	Bug Fix	Server-side event handlers are not fired for any controls placed in a user control which is dynamically created for an exp group.
<b>WebExplorerBar</b>	Bug Fix	Items set as selected at design time, in the WebExplorerBar remain selected even after selecting another item.
<b>WebExplorerBar</b>	Bug Fix	WebDropDown used as ItemTemplate does not work with control and dropdown does not open
<b>WebHierarchicalDataGrid</b>	Bug Fix	Exception "Object does not support this property" with column moving behavior used and it freezes the entire screen w mode of compilation as false in web.config file
<b>WebHierarchicalDataGrid</b>	Bug Fix	Cannot add new row to child band via the row adding behavior.
<b>WebHierarchicalDataGrid</b>	Bug Fix	Columns shrink after async postback in IE8. Note: That failure of layout happens due to bugs in IE8. For some reason the of TBODY of TABLE becomes much smaller than width of its TABLE. The fix includes temporarily hiding and showing TABLE containing grid-data. That might trigger flickering, but that is not possible to fix.
<b>WebResizingExtender</b>	Bug Fix	Resize extender is not added to the corner of the image in IE7, but floats next to it
<b>WebSchedule</b>	Bug Fix	Multiday appointments on client are multiplied by number of days

<b>WebSchedule</b>	Bug Fix	Many articles in our ASP help documentation for 11.2 and up contain references to retired “WebWeekView” control.
<b>WebSpellChecker</b>	Bug Fix	WebSpellChecker unable to check multiple text boxes due to checkSpelling() function modifications. Note: Logic was implemented to restrict combination of 2nd and 3rd parameters in checkSpelling(...) was removed. Now application may pass both parameters. You should not use explicit update of target field. Example: <pre>function CheckSpelling(index) {     currentIndex = index;     if (currentIndex &lt; controls.length) {         var id = controls[currentIndex];         var func = function() {             setTimeout(function() { CheckSpelling(++currentIndex); }, 0);         };         owpcChecker.checkSpelling(\$get(id).value, func, id);     } else {         alert("Spell check is complete.");     } }</pre>
<b>WebSpellChecker</b>	Bug Fix	CLR4.5 Presets are missing for WebSpellChecker dialog controls
<b>WebSplitter</b>	Bug Fix	Splitter fails to process mouse
<b>WebTab</b>	Bug Fix	WebTab control has an accessibility validation issue
