## Release Notes

Component	Product Impact	Description
<b>Infragistics Excel Engine</b>	Bug Fix	<p>“Print object” property is not maintained on objects inside imported Excel workbooks when exporting.</p> <p><b>Note:</b> Fixed an issue in the Excel library where the print and locked settings for shapes were getting lost when loading a 2007 format file</p>
<b>Infragistics Excel Engine</b>	Bug Fix	<p>NullReferenceException is thrown upon loading Excel.</p> <p><b>Note:</b> Fixed an issue in the Excel library where loading certain format strings from a workbook file were causing a NullReferenceException.</p>
<b>Infragistics Excel Engine</b>	Bug Fix	<p>Unable to set a hyperlink formula/style</p> <p><b>Note:</b> Added support for hyperlinks in the Excel library. There is now a WorksheetHyperlink class to represent a hyperlink, a Worksheet.Hyperlinks collection to hold the hyperlinks on the worksheet, a WorksheetCell.GetHyperlink() method to get the effective hyperlink on a cell (either obtained from the Hyperlinks collection or applied by a formula containing a HYPERLINK function), and a WorksheetRow.GetCellHyperlink(int) method to get a cell's hyperlink without needing to allocate a WorksheetCell instance.</p>

# Infragistics® ASP.NET

		"NullReferenceException: Object reference not set to an instance of an object." thrown when trying to export with CellBorderLineStyle set to anything different than Default <b>Note:</b> Fixed an issue in the Excel library where a NullReferenceException could occur when saving.
<b>Infragistics Excel Engine</b>	Bug Fix	
<b>WebDataGrid</b>	Bug Fix	Hidden fields become visible at sorting after columns are re-defined.
<b>WebDataGrid</b>	Bug Fix	JavaScript error "\$IG is not defined" is thrown when async postback is made and the grid is not visible
<b>WebDataGrid</b>	Bug Fix	When using a DropDownEditorProvider the Text of the provider is send to the RowUpdating event instead its Value
<b>WebDataGrid</b>	Bug Fix	After adding one row, any additional row adds require selecting the item in the DropDownProvider twice
<b>WebDataGrid</b>	Bug Fix	DefaultColumnWidth setting is ignored for group columns.
<b>WebDataGrid</b>	Bug Fix	The RowEditingTemplate is displayed in the top left corner instead of next to the row in Internet Explorer 8 when the first column of the grid is hidden
<b>WebDataGrid</b>	Bug Fix	DataFormatString property of BoundDataField is missing from API docs
<b>WebDataGrid</b>	Bug Fix	Async request failed with http exception when TemplateFields are displayed
<b>WebDataGrid</b>	Bug Fix	InvalidOperationException appears in the output window when the page that contains WebDataGrid is closed if some behaviors are enabled.
<b>WebDataGrid</b>	Bug Fix	Hidden columns appear visible after refreshing the page and showing the grid.
<b>WebDataGrid</b>	Bug Fix	Exception is thrown on postback when binding grid that has grouped columns
<b>WebDataGrid</b>	Bug Fix	Sorting of unbound grid column doesn't work correctly
<b>WebDataGrid</b>	Bug Fix	Header style is not applied via CssClass when CssClass is set in button click event
<b>WebDataGrid</b>	Bug Fix	ClearDataSource method causes NullReferenceException when both DataSource is null and Filtering.CaseSensitive is set to false
<b>WebDataGrid</b>	Bug Fix	Templated LinkButton disappears and the item command event is not fired when it's clicked if it's in a grouped column and one of the other columns is removed in runtime.

# Infragistics® ASP.NET

<b>WebDataGrid</b>	Bug Fix	When AutoPostBackFlags for RowSelectionChanged is set to true cannot open a cell in edit mode
<b>WebDataGrid (Activation)</b>	Bug Fix	Programmatically setting Active/Selected cell doesn't enable Excel cell navigation
<b>WebDataGrid (Batch Updating)</b>	Bug Fix	Row updating not working when there is BoundCheckbox Column <b>Note:</b> When WebDataGrid has updating behavior enabled and has column bound to checkbox fields, then updating is not working properly.
<b>WebDataGrid (Column Summaries)</b>	Bug Fix	In Internet Explorer opening a column summary will prevent any subsequent summary to open for other column
<b>WebDataGrid (Editing)</b>	Bug Fix	Filter in DropDownProvider remains after going to a different cell in the column.
<b>WebDataGrid (Editing)</b>	Bug Fix	When selecting a value from drop-down and then clicking on other cell a JavaScript error is thrown
<b>WebDataGrid (Editing)</b>	Bug Fix	When there is WebDropDown editor provider and deleting a cell value "null" is displayed instead of empty text
<b>WebDataGrid (ExcelCopyPaste)</b>	Bug Fix	When copying from a cell with Ctrl+C, user is prompted to Allow/Deny access to clipboard, the cell enters edit mode with "c" in the input
<b>WebDataGrid (Filtering)</b>	Bug Fix	The ExcelFiltering drop-down is cut off when browser is resized to about a third of its width or less.
<b>WebDataGrid (Filtering)</b>	Bug Fix	When filtering is disabled for a column the filter cell does not look correct
<b>WebDataGrid (Filtering)</b>	Bug Fix	When page is scrolled left the ExcelFiltering drop-down position is not correct
<b>WebDataGrid (Row Editing)</b>	Bug Fix	OnRowUpdating isn't being fired for cells with DropDownProvider that has EnableAutoFiltering set to Server
<b>WebDataGrid (Selection)</b>	Bug Fix	RowSelectionChanging event is fired 2 times
<b>WebDataGrid (Templates)</b>	Bug Fix	When a column has template applied after sorting of the column the values in the template are empty
<b>WebDataMenu</b>	Bug Fix	The page freezes while hovering over the items and sub items in Internet Explorer 11
<b>WebDataMenu</b>	Bug Fix	When clicked in Internet Explorer 7 on text or image in menu item does not redirects to Url

# Infragistics® ASP.NET

<b>WebDataMenu</b>	Bug Fix	Item doesn't get clicked when clicking over the text of the item
<b>WebDataTree</b>	Bug Fix	A JavaScript error "Uncaught TypeError: Cannot read property 'src' of undefined" is thrown when adding tree node with right click
<b>WebDropDown</b>	Bug Fix	The DropDownListItems' Target property does not work
<b>WebDropDown</b>	Bug Fix	WebDataGrid inside ItemTemplate throws error on DataBind.
<b>WebDropDown</b>	Bug Fix	First value in WebDropDownEditor provider is selected when a Space key is pressed in the input field of the provider with already entered number
<b>WebDropDown</b>	Bug Fix	'Cannot read property 'keyCode' of undefined ' exception is thrown when EnableAutoFiltering="Client"
		<p>Paging numbers disappear when filtering a value</p> <p><b>Note:</b></p> <p>The DropDownListProvider EnableViewState property should be set to false in order for a server filter to not be persisted through postback. This will also eliminate the visual issue of the pager going outside of its container. The ViewState is in conflict with the DropDownListProvider client state in this particular case.</p>
<b>WebDropDown</b>	Bug Fix	<EditorControl EnableViewState="false">
<b>WebExcel Exporter</b>	Bug Fix	Filtering is lost when exporting if Paging is Enabled and DataExportMode is set to AllDataInDataSource
<b>WebExcel Exporter</b>	Bug Fix	Exporting WebHierarchicalDataGrid with Summaries while using German culture with decimals throws exception
<b>WebExplorerBar</b>	Bug Fix	Items remain when containing collection is cleared
<b>WebExplorerBar</b>	Bug Fix	WebExplorerBar.Groups.Clear() is causing ' System.NullReferenceException'
<b>WebHierarchicalDataGrid</b>	Bug Fix	When IsSelfReference is set for a band an error is thrown: "Error during serialization or deserialization using the JSON JavaScriptSerializer"

HeaderCheckbox checkstate logic results in incorrect output

**Note:**

There are various errors in attached application. Some of them:

1. The "set" methods expect a parameter within (), but not outside statements like  
columnWithCheckbox.set\_headerChecked() == true;

Application may use

```
columnWithCheckbox.set_headerChecked(true);
```

2. A call to checkBoxCell.set\_value(...) may modify value/checkbox located in  
parent column of cell. Therefore, a loop with statement like

```
cell.set_value(columnWithCheckbox.get_headerChecked());
```

will produce unexpected result. If header was checked and any cell in column had  
unchecked state, then after aCell.set\_value(true), its parent column  
gets unchecked state, and columnWithCheckbox.get\_headerChecked() will return  
false for all further iterations in loop.

Suggestion: create a var before loop and use it to set values of cells. Example:

```
var val = columnWithCheckbox.get_headerChecked();
```

```
for (...) {
```

```
    ...  
    cell.set_value(val);
```

```
}
```

When WebHierarchicalDataGrid has UnboundCheckBoxField, if we try to set the  
header check state, using the client-side API, it is not set properly.

Hidden Column show after grouping a grid, located in an IFRAME. Happens after  
another grid located in a second IFRAME has been filtered and AJAX is enabled

When there's a hidden column for the child band the Delete button gets stuck to  
the first child row.

Load on demand issue when expanding parent row and populate childs

ParentRow items don't have values

Bug Fix

# Infragistics® ASP.NET

<b>WebHierarchicalDataGrid</b>	Bug Fix	When defining controls in header template inside a GroupField, the controls are not available on postback.
<b>WebHierarchicalDataGrid</b>	Bug Fix	When GroupAreaVisibility is initially set to Hidden, it could not be changed to Visible using a postback toggle button
<b>WebHierarchicalDataGrid</b>	Bug Fix	Getting significantly slow to expand a node after several expansions with LoadOnDemand.
<b>WebHierarchicalDataGrid</b>	Bug Fix	IndexOutOfRangeException during postback after selecting item from a DropDownProvider
<b>WebHierarchicalDataGrid</b>	Bug Fix	When EnableDataViewState is enabled, on postback an expand column is added for the child grid.
<b>WebHierarchicalDataGrid</b>	Bug Fix	"Failed to load ViewState" error on postback with a button on a template field in child band
<b>WebHierarchicalDataGrid</b>	Bug Fix	FindControl method returns null
<b>WebHierarchicalDataGrid</b>	Bug Fix	RowNotInTableException is thrown, after applying any behavior for a child band, when the whole data source is not provided initially and manually handling grid binding in ContainerGridBinding event
<b>WebHierarchicalDataGrid (Batch Updating)</b>	Bug Fix	MissingRecordException thrown when row is updated with BatchUpdating and EnableAutoFiltering is set to Server on a DropDownProvider <b>Note:</b> When WebDataGrid has BatchUpdating feature enabled and the grid uses DropDownProvider, with its EnableAutoFiltering option set to "server", then if we try to update a row in the grid, then MissingRecordException is thrown.
<b>WebHierarchicalDataGrid (Row Editing)</b>	Bug Fix	RowUpdating event not firing after first postback
<b>WebHierarchicalDataGrid (Row Editing)</b>	Bug Fix	Editors do not appear in the correct location for child bands when scrolling and using Internet Explorer 8 compatibility mode with Internet Explorer 8 document mode
<b>WebHierarchicalDataSource</b>	Bug Fix	RowNotInTableException is thrown when the whole data source is not provided initially and manually handling grid binding in ContainerGridBinding event
<b>WebHtmlEditor</b>	Bug Fix	Context menu does not appear after an async postback

# Infragistics® ASP.NET

<b>WebHtmlEditor</b>	Bug Fix	"Attempt by a security transparent method to access security critical type 'System.Web.UI.Design.ControlDesigner' failed" exception is thrown when trying to change the language of the control
<b>WebImageButton</b>	Bug Fix	Button style cursor setting not respected when enabled from JavaScript after disable appearance set to default at initialization
<b>WebMaskEditor</b>	Bug Fix	When content is pasted using a context menu it is not formatted the same as when Ctrl+V paste is used
		Visible custom dictionary path
<b>WebSpellChecker</b>	Bug Fix	<b>Note:</b> This property is no longer transmitted to the client. Note that it should either be set in the aspx or always set on load because it cannot be persisted by the control on postback.
<b>WebSpellCheckerDialog</b>	Bug Fix	Custom Dialog sample for the spellchecker is not working in Chrome
<b>WebTab</b>	Bug Fix	UserControl content is lost after postback if UserControlUrl is set only on the initial load
<b>WebTextEditor</b>	Bug Fix	Cannot enter a left parenthesis on the input field
<b>WebUpload</b>	Bug Fix	Memory leak on the server as page is refreshed several times
<b>WebUpload</b>	Bug Fix	ClientID is always the last UserControl on the form
