Release Notes

Component	Product Impact	Internal Issue	Description
Excel Engine	Bug	206186	When ExcelEnginge opens an excel document, adds a row and save it to another excel document, then the newly saved file contains the maximum possible columns in the spreadsheet - 16384, instead of the columns defined in the file that has been read.
WebCaptcha	Bug	221970	When WebCaptcha is placed in a ContentPlaceholder, then error is thrown, saying that it cannot find the editor with the given id.
WebDataGrid	Bug	219524	When WebDataGrid has Editing behavior enabled, together with EnableOnKeyPress set to true, and has DatePicker provider as editor for one of its columns, then opening a cell with such a provider and entering a string to filter the drop down items, then inside the body of the EnteredEditMode client-side event, if you use the grid client-side API to get drop down items length, it is incorrect.
WebDataGrid	Bug	221707	WebDataGrid filtering dialog does not render correctly when grid is placed inside a web form with attribute "dir" set to "rtl".
WebDataGrid	Bug	221455	When WebDataGrid has Editing behavior enabled and has DateTime as editor provider for several of its columns, each column with defined different display mode format, then entering incorrect value for some of them will result in preserving them.

WebDataGrid	Bug	222391	When WebDataGrid has Editing behavior enabled and has DatePicker provider as an editor for one of its columns, then opening a cell with such a provider and trying to navigate through the drop down items in Internet Explorer Edge, using up and down arrow keys will not be possible, instead navigation through browser autocomplete list will occur.
WebDataGrid	Bug	222594	When WebDataGrid has Editing behavior enabled, together with EnableOnKeyPress set to true, and has DatePicker provider as an editor for one of its columns, then opening a cell with such a provider and entering a string to filter the drop down items, results in losing the drop down selection.
WebDataGrid	Bug	222953	When WebDataGrid has Editing behavior enabled and has DateTime as editor provider for one of its columns, with defined display mode format "HH:mm:ss", then entering manually hour, minutes and seconds as a value and exiting edit mode, will result in not saving this value.
WebDataGrid	Bug	218374	When WebDataGrid has EditingCore and BatchUpdating behaviors enabled then changing the cell value multiple times and using the client-side method clearBatchUpdates() to revert initial cell value, it is reverted.
WebDataGrid	Bug	221887	When WebDataGrid has EditingCore and RowSelectors behaviors enabled then clicking row checkbox and deleting the row, will result in checkbox to stay checked after the postback.
WebDataMenu	Bug	221700	When WebDataMenu has defined horizontal orientation for its items, even the menu has Font-Bold options set to true, the items style is not bold.
WebHierarchicalDataGrid	Bug	210319	When WebHierarchicalDataGrid has Editing behavior enabled and has DatePicker provider as editor for one of its columns, then entering invalid value in that cell and exiting edit mode, results in firing InvalidValueEntered multiple times.
WebHierarchicalDataGrid	Bug	219578	When WebHierarchicalDataGrid RowIslandsPopulating event is fired, the value of the e.Row.Level is always 0, no matter how deep we are in the grid hierarchy.
WebHierarchicalDataGrid	Bug	222730	When WebHierarchicalDataGrid has Editing behavior enabled and has DatePicker provider as editor for one of its columns, then entering invalid value in that cell and exiting edit mode, results in firing client-side event ExitingEditMode before InvalidValueEntered one.

Infragistics® ASP.NET

WebHierarchicalDataGrid	Bug	222479	When WebHierarchicalDataGrid has Editing behavior enabled, then clicking on a parent row cell and clicking on another cell, in the same row, in Chrome, Firefox and Internet Explorer browsers, will leave the first cell in edit mode, until you click outside the grid, instead of exiting the first cell and entering edit mode in second one.
WebImageButton	Bug	220887	Disabled WebImageButton text is black instead of grey in Internet Explorer, version 10 and higher.
WebImageButton	Bug	222378	When WebImageButton control has a client-side handler for its click event, and inside the handler body there is alert() call, then clicking a WebImageButton and clicking outside the control will result in firing the event twice, instead of only once.
WebSchedule	Bug	222296	It's not possible to update and WebSchedule appointment in Internet Explorer Edge.
WebTab	Bug	217515	When WebTab property AutoSize is enabled and the content of one of the tabs has a page that defines a WebHierarchicalDataGrid control, then expanding a grid child band and scrolling down the page to the bottom and expanding another child band, results in resetting the scrolling position.
WebTab	Bug	222401	When WebTab has scrollable display mode and defined rounded background for its Content Page, then the tab height automatically increases, even the auto size option of the content pane is set to false.
