Release Notes

Component	Product Impact	Internal Issue	Description
WebDataGrid	Bug	226761	If WebDataGrid has Batch Updating behavior enabled then trying to commit a grid changes for composite data keys, which values are not set, causes an exception to be thrown after the postback to the server occurs.
WebDataGrid	Bug	229173	When WebDataGrid has EditingCore behavior enabled, and has Percent Editor as provider for one of its columns, then adding a new row and setting value in the editor, doesn't preserve the value after the focus is lost.
WebDataGrid	Bug	229185	When WebDataGrid has EditingCore behavior enabled and when the validation fails, while adding a new row, then RowAdding event fires twice.
WebDataGrid	Bug	228882	When WebDataGrid column is removed on server-side, using the RemoveAt method, then column order is not persisted.
WebDataGrid	Bug	228998	When WebDataGrid has Summary behavior enabled, then CalculateCustomSummary server-side event is fired twice.

INFRAGISTICS
DESIGN / DEVELOP / EXPERIENCE

Infragistics® ASP.NET

WebDataGrid	Bug	222863	When WebDataGrid has column with a name that contains double hyphens, then selecting a row causes a NullReferenceException to be thrown.
WebDocumentExporter	Bug	225968	When WebHierarchicalDataGrid has Grouping behavior enabled and Arabic content, then grouping a row and exporting the grid to PDF, causes the counter in the grouped row not to be exported correctly.
WebDropDown	Bug	226780	When WebDropDown has EnableAutoFiltering option set to Client and has several WebDropDown list items that are selected from server-side, they still stay as selected, even after a new list item is selected.
WebDropDown	Bug	226548	When WebDropDown has EnableAutoFiltering option set to Client and has a WebDropDown list item that is selected from server-side, the item doesn't appear as selected, when the client-side method get_selectedItem() is invoked.
WebEditors	Bug	228569	When a not fully formatted date, e.g. 11/3/2015 3:24 PM (with missing leading zeros), is pasted in the WebDataTimeEditor, using the mouse context operations copy and paste, then the value in the editor is not correct.
WebHierarchicalDataGrid	Bug	207775	When WebHierarchicalDataGrid InitialDataBindDepth is set to -1, then collapsing a parent row, editing cell value in it, and expanding the row again, causes a JavaScript NullReferenceException to be thrown.
WebHierarchicalDataGrid	Bug	225578	When WebHierarchicalDataGrid has FilterType set to ExcelStyleFilter and has DateTime column, if a null value is set to a cell from that column, then exception is thrown.
WebSplitter	Bug	227235	When WebSplitter control is placed in another WebSplitter, and the child splitter has pane with width, set to 50%, then the pane is not rendered with correct width.
