Release Notes

Component	Product Impact	Description
igDataSource	Bug Fix	Calling sort() with an empty expressions array and then using data() causes data re-ordering under Chrome.
igDataSource	Bug Fix	igDataSource is not populated when using a version of jquery.min.js newer than 1.4.4.
igDateEditor	Bug Fix	igDateEditor value gets deleted on blur when entering 60 as a value for minutes or seconds.
igDatePicker	Bug Fix	igDatePicker year select dropdown cannot be opened when changeYear option is set to true. **Note:** Fixed for IE7/8/9, Firefox, Safari and Chrome. For Opera changeYear has been disabled and it is not supported. It is possible that in future versions, the "changeYear" will be disabled for other browsers as well, because it may break focus functionality of igEditor. It is not recommended to use that option.
igDatePicker	Bug Fix	igDatePicker minDate and maxDate options are not applied.
igEditor	Bug Fix	MinValue and MaxValue options are not properly applied when set through code. **Note:** Fixed with breaking change. In old version of igEditor, the mix/maxDate options of jquery.datepicker had priority over possible min/maxValue of igDatePicker. Now, dynamically set min/maxValue will override possible custom options of jquery.datepicker.
igEditor	Bug Fix	MVC edtitors do not render HTML attributes.
igFileUpload	Bug Fix	Deprecated image references are left over in the igUpload's CSS file (ig.ui.upload.css).
igFileUpload	Bug Fix	When clicking on "Hide details" link in Internet Explorer 7 the link doesn't change to "Show details".

igGrid	Bug Fix	An exception is thrown when the igGrid is bound to an HTML table and the dataSourceType = htmlTableString.
igGrid	Bug Fix	Exception is thrown when cancelling rendering event for igGrid.
igGrid	Bug Fix	Initializing the grid with any feature after a previous grid was bound and destroyed on the same DIV element causes an exception.
igGrid	Bug Fix	When the igGrid is initialized for the 2nd time on TABLE element by destroying the previous grid instance, the grid is not appended to the DOM correctly.
igGrid	Bug Fix	When using virtualization and the grid is scrolled horizontally, the IDs of the column header cells are not updated accordingly.
igGrid	Bug Fix	Sorting a column doesn't show correct results when virtualization is enabled and the vertical scrollbar is not in default position.
igGridFiltering	Bug Fix	The filter summary is incorrect when local filtering and remote paging are enabled.
igGridFiltering	Bug Fix	igGridFiltering filterDialogFilterColumnsListTemplate option is declared but never used in the source code. **Note:** Option is removed from the source code.
igGridFiltering	Bug Fix	Column headers disappear after the first character you typed is deleted in filtering condition when igGrid is bound to an HTML Table.
igGridFiltering	Bug Fix	Property FilterLogicUrlKey is missing in Filtering MVC wrapper, but exists in Filtering model.
igGridSelection	Bug Fix	When you select cells by dragging the mouse vertically the selection lags and sometimes misses the last cells.
igGridSelection	Bug Fix	After selecting several rows by holding Shift, keyboard navigation doesn't work if Shift or Ctrl are released.
igGridSorting	Bug Fix	If a column has "allowSorting" option set to false, after setting the dataSource option the column is sortable.
igGridSorting	Bug Fix	Multi-column sorting with a column sorted by default doesn't work correctly after the page size has been changed.
igMaskEditor	Bug Fix	igMaskEditor doesn't allow entering all symbols in Firefox when the editor mask has >= 21 symbols.
igPercentEditor	Bug Fix	Using igPercentEditor method "value" doesn't return the actual displayed text when dataMode=text or dataMode=editModeText.
Installers	Bug Fix	When having 11.1 and 11.2 versions installed alongside and apply SR for 11.1 the installer will remove the 11.2 Infragistics.Web.Mvc.dll from the "Add Reference" dialog of VS 2010.
JavaScript	Bug Fix	The functions appended to the JavaScript Array prototype by ig.util.js are iterated when using a regular Array. **Note:** ig.util.js is appending functions to JavaScript Array prototype, but these functions should not be iterated when iterating through regular Array.
