Component	Product Impact	Description
igCombo	Bug Fix	Unable to select item from value list when type ahead filtering in Internet Explorer 8
igEditor	Bug Fix	Number formatting regional settings for en-GB are incorrect
igGrid	Bug Fix	Thumb for vertical scrollbar is not hidden with rowVirtualization = true after deleting all rows <b>Note:</b> Deleting rows through igGridUpdating with autoCommit true should no longer cause virtual grids to render incorrect number of rows and the virtual vertical scrollbar should properly update to reflect the new number of total rows.
igGrid	Bug Fix	Text is overlapped by the scroll bar when text is right aligned
igGrid	Bug Fix	Cannot enter edit mode on iOS when edit mode is set to "cell" you
igGrid	Bug Fix	Cell value is split into single character when a flat grid is shown after a hierarchical grid has been expanded
igGrid	New Functionality	Cannot change column template dynamically. <b>Note:</b> setColumnTemplate and setRowTemplate methods were added to the public API for igGrid. These can be used to change the grid templates (row or column ones) and optionally re-render the grid using the new settings.
igGrid	Bug Fix	When height is set to null, editing a new row the done/cancel buttons overlap the last column and if triggering a validator, scrollbars will appear
igGrid(Virtualization)	Bug Fix	Scroll height is not calculated correctly when virtualization is enabled
