

# Ignite UI™ 2013.2 Release Notes

---

Create the best Web experiences in browsers and devices with our user interface controls designed expressly for jQuery, ASP.NET MVC, HTML 5 and CSS 3. You'll be building on a solid foundation of robust Web technology without the need for plug-ins or extensions.

## Installation

|                    |  |

| <b>Downloading</b> | <a href="#">Download Ignite UI 2013.2 SR here.</a> |
|--------------------|--|

## Release Notes

| Component             | Product Impact | Description   |
|-----------------------|----------------|---|
| igChart               | Bug Fix        | Zooming is not working on igChart under IE11 running on Windows 8   |
| igChart               | Bug Fix        | Changing igDataChart.gridMode to "beforeSeries" through the API does not work in IE9<br><b>Note:</b><br>Changing the grid mode a runtime will now result in the grid layering being updated |
| igChart               | Bug Fix        | The chart's tooltips are not showing under IE11 in Windows8.1<br><b>Note:</b><br>IE11 style touch events are now supported in the igDataChart and igMap.                                    |
| igCombo               | Bug Fix        | Deleting a value is not possible in IE11 when igCombo.autoComplete is true  |
| igDialogWindow        | Bug Fix        | Dialog Window icons are misaligned under iPad Safari  |
| igGrid                | Bug Fix        | In Internet Explorer 8 when the grid has 100% width, Filtering is enabled and a column is hidden there is a blank space on the right of the grid.   |
| igGrid (ColumnFixing) | Bug Fix        | The topmost Multi-Column Headers columns can be fixed/unfixed with igGridColumnFixing.allowFixing set to false  |
| igGrid (ColumnFixing) | Bug Fix        | Row Selectors checkboxes are not clickable after column is fixed and sorting is applied   |

|                         |         |   |
|-------------------------|---------|---|
|                         |         | <p>Incorrect column moving behavior when moving columns in the root layout after child layout is expanded. Both of the layouts have Multi-Column Headers enabled</p> <p><b>Note:</b><br/>Resolved an issue with Column Moving which caused child layouts to be affected from a parent layout column moving.</p> |
| igGrid (ColumnMoving)   | Bug Fix |   |
| igGrid (ColumnResizing) | Bug Fix | Resizing on child layout when igGrid.showHeaders is false throws a JavaScript error   |
| igGrid (FeatureChooser) | Bug Fix | Feature chooser keyboard navigation issues  |
| igGrid (Knockout)       | Bug Fix | Wrong records are shown in the grid after filtering and updating the observable model   |
|                         |         | <p>Unable to update the cell values with the Knockout.js 3.0 version</p> <p><b>Note:</b><br/>Implemented additional Knockout.js 3.0 compatible cell binding logic for igGrid and igHierarchicalGrid.</p>  |
| igGrid (Knockout)       | Bug Fix |   |
| igGrid (Knockout)       | Bug Fix | Adding a row in a grouped grid bound to Knockout.js observable array does not cell bind it  |
| igGrid (Knockout)       | Bug Fix | Updating an observable property while the row is filtered out and then clearing the filter through API shows a not updated cell   |
| igGrid (MergedCells)    | Bug Fix | Cell merging has box shadow for the first and the last column   |
| igGrid (Responsive)     | Bug Fix | When the grid has width in percentages less than 100%, Responsive would still force it to 100% width  |
| igGrid (Responsive)     | Bug Fix | Responsive template changing fails initially if no general igGrid.rowTemplate is set to the grid and the 'next' mode template is the default  |
|                         |         | <p>The igRowSelectors.checkBoxStateChanging event does not have information whether SHIFT key is pressed</p> <p><b>Note:</b><br/>Added reference to the original mouse events for the RowSelectors checkBoxStateChanging and checkBoxStateChanged events.</p>   |
| igGrid (RowSelectors)   | Bug Fix |   |
| igGrid (RowSelectors)   | Bug Fix | Checkboxes doesn't appear as selected after selecting multiple checkboxes when igGrid.showHeader is false   |
| igGrid (RowSelectors)   | Bug Fix | Row Selectors checkbox is not unchecked when Ctrl + Click on the last selected row  |

|                               |         |  |
|-------------------------------|---------|--|
| igGrid (Selection)            | Bug Fix | Touch drag selection does not work under IE11  |
| igGrid (Sorting)              | Bug Fix | Different box shadows for the first and the last columns when sorting compared to other columns  |
| igGrid (Updating)             | Bug Fix | When igGrid.aggregateTransactions is true, updating a recently added row creates a new transaction instead of aggregating both to one  |
| igGrid (Updating)             | Bug Fix | Mousing over a read-only cell during row edit mode when igGridUpdating.excelNavigationMode is true causes an exception<br><b>Note:</b><br>Resolved an issue causing navigating to a checkbox column when excel style navigation is enabled to throw an exception. Resolved an issue preventing the excel style navigation to wrap around the grid. |
| igGrid (Updating)             | Bug Fix | Showing "Delete" button on touch does not work under IE11  |
| igGrid (Virtualization)       | Bug Fix | Duplicated iggridvirtualrecordsrender event on changing pages  |
| igGrid (WebApi Rest)          | Bug Fix | With jQuery 1.9 and later REST updating does not recognize "204 No Content" response as successful   |
| igHierarchicalGrid            | Bug Fix | Cannot expand row which was previously cancelled from expansion in igHierarchicalGrid.rowExpanding event   |
| igHierarchicalGrid            | Bug Fix | Loading indicator isn't well positioned when used for hierarchical grid expand row scenario  |
| igHierarchicalGrid            | Bug Fix | HierarchicalGrid Load on Demand does not work with OData 3 service<br><b>Note:</b><br>Added support for Odata v 3 Load on Demand.  |
| igHierarchicalGrid (Knockout) | Bug Fix | Cell binding is lost after sorting<br><b>Note:</b><br>Resolved an issue preventing igHierarchicalGrid's parent layout from rebinding the igCell binding handler for all cells after changes in the grid's state has been made.   |

|                               |             |   |
|-------------------------------|-------------|---|
|                               |             | In a hierarchical grid bound to a KO observable, after expanding one row, rows can no longer be added<br><b>Note:</b><br>Resolved an issue preventing updates on records added after the grid has initialized from being properly addressed through KO's cell binding logic.  |
| igHierarchicalGrid (Knockout) | Bug Fix     |   |
| igPivotDataSelector           | Bug Fix     | Can't set preload hierarchies for the rows, columns, filters and measures when data has comma   |
| igPivotGrid                   | Bug Fix     | The column headers' drop area gets smaller when expanding the row headers   |
| igPivotGrid                   | Bug Fix     | Dimension members sorting doesn't work correctly in Google Chrome   |
| igPivotGrid                   | Bug Fix     | In the filter the expander renders for a level that does not have a child   |
|                               |             | Aggregator function context doesn't give information about which node value is being calculated<br><b>Note:</b><br>Each measure's aggregator function has been provided with second parameter named cellMetadata. This parameter provides information about the cell context which aggregator function is called about. The exposed data is as follows:<br>- cellMetadata.rowIndex() - Gets the index of the row tuple this cell is related to.<br>- cellMetadata.columnIndex() - Gets the index of the column tuple this cell is related to.<br>- cellMetadata.cellOrdinal() - Gets the cell ordinal.<br>- cellMetadata.measureIndex() - Gets the index of the measure this cell is related to.<br>- cellMetadata.rowTuples() - Gets the array of the row tuples.<br>- cellMetadata.columnTuples() - Gets the array of the column tuples.<br>- cellMetadata.measures() - Gets the array of the measures. |
| igPivotGrid                   | Bug Fix     |   |
|                               |             | Cannot drag a node from a tree to another tree that does not have nodes.<br><b>Note:</b><br>Now an empty tree would accept nodes dropped onto it.   |
| igTree                        | Improvement |   |
| igZoomBar                     | Bug Fix     | Zoombar incorrectly infers the sync options from the parent charts  |
| MVC Wrappers (Chart)          | Bug Fix     | There is no way to set gradient colors through the MVC wrappers   |

|                               |         |   |
|-------------------------------|---------|---|
| MVC Wrappers (Editor)         | Bug Fix | Input value is not send to the server when Enter key is pressed   |
| MVC Wrappers (Editor)         | Bug Fix | Data Annotation Validation do not work on client side when class is decorated with [MetadataType] attribute |
| MVC Wrappers (Grid Summaries) | Bug Fix | Sorting and Summaries styles are applied to a child layout column after sorting of parent layout column     |
| Samples Browser               | Bug Fix | Background color for categories in hamburger menu should be removed   |
|                               | Bug Fix | Improve the icon of the Ignite UI samples installation under Windows 8 and Windows 8.1                      |
