			order to avoid making visual breaking changes, this mode is optional, for now, and can be enabled for axes via useEnhancedIntervalManagement = true
241677	igDataChart	Bug Fix	<p>Incorrect text layout when chart is in "Right to Left" mode.</p> <p>Note: A scenario where text would not be anchored to the correct location in RTL mode was resolved.</p>
240258	igDoughnutChart	Bug Fix	<p>Label color changes when both of brushes and outlines options are set.</p> <p>Note: Fixed an issue where the initial default colors for the inner and outer labels were being overridden when the Doughnut Chart was initialized. If possible, the inner and outer label colors should be pulled from CSS using the .ui-chart-inner-labels and .ui-chart-outer-labels classes and used as the default colors.</p>
