Grid	Bug Fix	<p>The filter menu shows the items of the ComboBoxColumn using the SelectedValuePath property value.</p> <p>Notes: A new converter property named FilterMenuItemConverter of type IValueConverter is added for the xamGrid ComboBoxColumn and MultiColumnComboColumn to provide an easy way for converting the displayed items text in the filter menu.</p>

Now, this behavior is changed – if you collapse the last visible child column - it is collapsed as well as its parent column. The other change is when you switch the visibility of a parent column from collapsed to visible – the parent column becomes visible as well as all its children columns.</p>
Multi Column Combo	Bug Fix	Multi Column Combo does not keep the foreground of the selected item when hovered.

Rich Text Editor	Bug Fix	Image is not exported to RTF. Notes: Fixed an issue with the RichTextDocument where RTF files saved and opened in WordPad on a Windows 7 machine would not display images.

Rich Text Editor	Bug Fix	Pasting in a list is not working when using PlainTextSerializationProvider.

Tile Manager	Bug Fix	<p>Scrolling doesn't work smoothly.</p> <p>Notes: A TileRetentionMode property has been added to XamTileManager. It defaults to 'Release' which will cause generated tiles that are scrolled out of view to be released which will eliminate unnecessary elements from remaining in the visible tree. This preserves the current behavior.</p> <p>When TileRetentionMode is set to 'Retain' then generated tiles that are scrolled out of view will be retained in the visual tree to optimize scrolling performance when they are subsequently scrolled back into view.</p>
