

INFRAGISTICS Silverlight 16.1 – Release Notes – April 2016

Raise the Bar on Both Business Intelligence and Web UI with Infragistics Silverlight Controls.

Infragistics Silverlight controls provide breadth and depth in enabling developers to bring modern, trend-setting applications to market while shortening development time. If you need gesture/touch support, dynamic themes, and lightning fast performance in one Silverlight package, look no further.

The screenshot shows a web application titled "CamPivotGrid". It displays a data table with columns for "Country", "Population", and "GDP per Ca". To the right of the table is a chart with a red bubble and other data points.

| Country | Population | GDP per Ca |
|----------------|------------|------------|
| Luxembourg | 1 M | \$54,844 K |
| Macedonia, FYR | 3 M | \$2,178 K |
| Moldova | 5 M | \$0,588 K |
| Montenegro | 1 M | \$2,358 K |
| Netherlands | 17 M | \$27,307 K |
| Norway | 5 M | \$42,430 K |
| Poland | 39 M | \$6,222 K |
| Portugal | 11 M | \$11,493 K |
| Romania | 23 M | \$2,845 K |
| Serbia | 11 M | \$1,810 K |

The screenshot shows a web application titled "AVEE TALENT". It features a user profile for "Maria Anders" at "Alfreds Futterkiste". The profile includes contact information such as phone, fax, and email. Below the profile is a bar chart with four blue bars of varying heights. To the right of the chart is a "SYSTEM" section with dates for "Last Payment", "Last Shipment", and "Last Invoice".

What's New

| Components | Feature Name | Description |
|--------------|--|--|
| Schedule | Recurrence dialog's description label visibility | The description in the xamSchedule's activity recurrence dialog is now visible by default for German and French languages. |
| Radial Gauge | Needle Dragging | You can now move the needle on the gauges by enabling the IsDraggingEnabled property. |
| Linear Gauge | Needle Dragging | You can now move the needle on the gauges by enabling the IsDraggingEnabled property. |

What's Changed

| Components | Product Impact | Description |
|--------------|----------------|---|
| Color Picker | Bug Fix | Localization is using CurrentCulture instead of CurrentUICulture. |
| Combo Editor | Bug Fix | Dropdown list does not display when pasting the text which is currently displayed into the editor. |
| Combo Editor | Bug Fix | The XamComboEditor's SelectedItem does not work properly when items filtering is applied. |
| Combo Editor | Bug Fix | Setting the xamComboEditor VerticalContentAlignment property doesn't affect the vertical alignment of the selected items in the textbox. |
| Combo Editor | Bug Fix | The items content is not stretched when the XamComboEditor ItemTemplate is used and the content HorizontalAlignment is set to Stretch. |
| Combo Editor | Bug Fix | <p>XamComboEditor throws an exception when the user selects already selected item with Enter key.</p> <p>Notes: Removed throwing the exception "Cannot select the same item multiple times." when selecting the same item again in the combo editors. Now, the element that is selected again is ignored if selected by keyboard arrows. If typed – it is cleared from the textbox.</p> |
| Combo Editor | Bug Fix | Dropdown does not appear below the control. |
| Combo Editor | Bug Fix | Dropdown height is shrunk when binding to a new collection and opening the dropdown by using the keyboard down arrow key. |
| Combo Editor | Bug Fix | <p>NullReferenceException thrown when SelectedItems is bound, IsEditable = true, and an ItemTemplate is applied.</p> <p>Notes: Resolved an issue in the XamWebComboEditor when the SelectedItems property was bound to a null value. In this case a null reference exception was raised.</p> |
| Combo Editor | Bug Fix | Tab stop is lost when placed inside of a tab in a XamDockManager and tab is loaded a second time. |

| | | |
|-------------------------|---------|---|
| Combo Editors | Bug Fix | The SelectionChanged event is not fired correctly when setting SelectedValues. |
| Combo Editors | Bug Fix | ArgumentOutOfRangeException is thrown when control is inherited and selection is changed in the xamRibbon QAT. |
| Combo Editors | Bug Fix | Cannot tab to shared combo editors in a TabControl. |
| Combo Editors | Bug Fix | Design-time error appears when changing the SelectedValuePath property in VS Properties pane. |
| Data Chart | Bug Fix | DataChart created in separate UI thread causes thread access exception |
| Data Chart | Bug Fix | When the ItemsSource gets ordered, sometimes the markers shown in a ScatterSeries will not correctly reflect the ItemsSource of that series. Notes: An issue was found where NotifyCollectionChangedAction.Move actions were ignored by FastItemsSource. This has been corrected. |
| Data Tree | Bug Fix | Memory and CPU performance issues when loading and scrolling with screen reading app open |
| Data Tree | Bug Fix | Items are not loaded when its Visibility is set to Visible at runtime |
| Data Tree | Bug Fix | SelectedNodesCollectionChanged event does not fire when the selected node is deleted |
| Dialog Window | Bug Fix | Modal dialog takes more time to complete loading than non-modal window. |
| Dialog Window | Bug Fix | Child modal dialog goes under parent modal dialog |
| Dialog Window | Bug Fix | DialogWindow is not positioned on top of a window that is already opened |
| Dialog Window | Bug Fix | System.ArgumentException is thrown when resizing the dialog window inside another dialog window. |
| DialogWindow | Bug Fix | The newly opened dialog window goes under the existing dialog window. |
| Drag and Drop Framework | Bug Fix | The dragged elements used by the WPF DragDrop framework will not intersect multiple monitors. |
| Excel | Bug Fix | UriFormatException on Workbook.Load(stream): Invalid URI: The hostname could not be parsed |
| Excel | Bug Fix | Loading of a file with hidden first worksheet is throwing an exception. |
| Excel | Bug Fix | Loading a workbook and saving it to a different file extension results in the workbook opening in Protected View. |

| | | |
|----------------|---------|--|
| Excel | Bug Fix | System.UriFormatException occurs when loading an Excel worksheet with an invalid link contained in it. |
| Geographic Map | Bug Fix | <p>GeographicSymbolSeries MarkerTemplate is rendered in a different place when its ItemsSource is cleared and the same points are added.</p> <p>Notes: An issue is found where markers in a marker series would not be centered properly when added at runtime, when the MarkerTemplate has height or width settings based on bindings. This has been fixed.</p> |
| Grid | Bug Fix | <p>[xamGrid]When double click to resize a group column, the header text disappears</p> <p>Notes: Public Notify Note</p> |
| Grid | Bug Fix | themes issues |
| Grid | Bug Fix | ActiveCell is not automatically scrolled into view when horizontal scrolling is needed |
| Grid | Bug Fix | The ColumnResized event is fired on a single click between column headers. |
| Grid | Bug Fix | PreferredImeState does not affect on the first time enter the filtertextbox. |
| Grid | Bug Fix | Scroll position is incorrect when using hierarchical data and user clicks the bottom cell. |
| Grid | Bug Fix | Headers and cells are misaligned on maximized window. |
| Grid | Bug Fix | Incorrect scrolling behavior when scrolling to the bottom of grouped hierarchies. |
| Grid | Bug Fix | Japanese characters cannot be directly entered into the filter editor on FilterMenu popup. |
| Grid | Bug Fix | The vertical scrollbar does not work properly if columns are grouped. |
| Grid | Bug Fix | Conditional format is not applied instantly after a page is changed. |
| Grid | Bug Fix | System.AccessViolationException occurred when using a Japanese IME's homonym note. |
| Grid | Bug Fix | <p>Column chooser does not show if the Popup in a control template is replaced or its Name is changed.</p> <p>Notes: This issue is by design. The entire logic of the control relies on that the root element in</p> |

| | | |
|------|---------|--|
| | | the control template is a Popup control. We will add TemplatePart attribute for all mandatory elements of the control template. |
| Grid | Bug Fix | Canceling the ActiveCell changing event causes a cell to be unselectable. |
| Grid | Bug Fix | XamGrid MouseLeftButtonUp is not fired when a dialog is displayed while exiting from edit mode. |
| Grid | Bug Fix | Header text containing new line characters is pasted into multiple cells in Excel. |
| Grid | Bug Fix | The scrollbar of the horizontal scrollbar does not sync with column widths. |
| Grid | Bug Fix | Moving cell focus by the arrow key sometimes jumps scrolling when there are GroupColumns. |
| Grid | Bug Fix | XamGrid unexpectedly scrolls to the rightmost. |
| Grid | Bug Fix | A cell of a column in a group column cannot be collapsed when the cell is in edit mode. |
| Grid | Bug Fix | Filters on the child rows are not updated by InvalidateData() method. Notes: We added a Boolean argument in the InvalidateData method called on all ColumnLayouts and its default value is False. In order to get the expected result (all hierarchies to be invalidated), one should call InvalidateData(true). |
| Grid | Bug Fix | Binding error occurs when entering/exiting edit mode on a TemplateColumn in a very short time repeatedly. |
| Grid | Bug Fix | Exception is thrown when column Visibility is changed in a grid with a fixed column after horizontal scrollbar is moved |
| Grid | Bug Fix | Columns of type decimal? have different FilterMenu options than columns of type decimal. |
| Grid | Bug Fix | A vertical border appears when the datasource is cleared. |
| Grid | Bug Fix | Setting FilteringScope to "ColumnLayout" causes NullReferenceException when grouping and trying to open the FilterMenu. |
| Grid | Bug Fix | Grouped column rendering is off when a full group is moved out of view and brought back into view. |

| | | |
|--------------------|-------------------------|---|
| Grid | Bug Fix | The time needed to initially load data when having a great number of columns has increased |
| Grid | Bug Fix | Active cell does not move by arrow keys if an editing cell is forced to exit edit mode by moving a scrollbar. |
| Grid | Bug Fix | StackOverflow exception is thrown when using CollectionView and ObservableCollection of objects |
| Grid | Bug Fix | ColumnMoving does not work in some cases |
| Grid | Bug Fix | Null Reference Exception when trying to open the FilterMenu after a column was ungrouped and FilteringScope is set to ColumnLayout |
| Grid | Bug Fix | Grouping is not possible via dragging a column over the expansion indicator when the group-by area is collapsed. |
| Grid | Bug Fix | Horizontal scroll is strange when group columns are used. |
| Grid | Bug Fix | Scroll thumb is placed at the bottom end of the vertical scrollbar even when there are more invisible rows below. |
| Grid | Bug Fix | Horizontal scrolling is choppy on the first scroll(until all columns are rendered) when there are GroupColumns |
| Grid | Bug Fix | Header columns and record columns get out of alignment in scrolling and resizing when group headers are used |
| Grid | Bug Fix | Horizontal scrolling is choppy in the case where there are few large columns at the beginning followed by a number of short ones |
| Grid | Bug Fix | Columns get out of alignment when vertical scroll bar is displayed, a lot of columns are used and datasource is repeatedly cleared and rebound |
| Grid | Breaking Change (Other) | <p>Filter dialog does not remove filter item consistently</p> <p>Notes: This is a breaking change because the behavior of the control is changed a little(No Api changes). Now when we set filters through the filter menu on more than one column and the filter menu is opened it will have unchecked checkbox for the filtered out items if this was the column that a filter was applied through the filter menu.</p> |
| Multi Column Combo | Bug Fix | The text is deleted after selecting a combo item and pressing backspace. |
| Multi Column Combo | Bug Fix | Setting DisplayMemberPath to null causes InvalidOperationException. |
| Multi Column Combo | Bug Fix | Control does not take focus when tabs are changed and the 'Tab' key is pressed |

| | | |
|--------------------|---------|---|
| Multi Column Combo | Bug Fix | InvalidOperationException when control is in a XamDataGrid and DisplayMemberPath and MinimumDropDownWidth properties are set. |
| Multi Column Combo | Bug Fix | When applying IgTheme/Office2010Blue theme for MulticolumnCombo via the ThemeManager |
| Multi Column Combo | Bug Fix | Horizontal scrollbar does not appear when the last column is in view but not fully visible |
| Network Node | Bug Fix | Connections disappear when programmatically navigating to the previous node. |
| Network Node | Bug Fix | Zoom level changes randomly when a GridSplitter is used for resizing. |
| Network Node | Bug Fix | The selected region does not contain all the nodes that are currently in view. |
| Pivot Grid | Bug Fix | LoadCustomizations callback shows a "\r\n" error message when the data source loads correctly. |
| Radial Menu | Bug Fix | Binding expression path error occurs when binding a Header property of RadialMenuItem. |
| Rich Text Editor | Bug Fix | <p>The caret does not change its style at the start position and in a new paragraph when typing some content with styles (like Italic, Subscript, and Superscript).</p> <p>Notes: Resolved an issue in the XamRichTextEditor where the Caret was not being rendered at a slight 'forward' angle when it was at a character position formatted as italic. The caret is now also correctly sized and positioned when it is at a character position that is formatted as superscript or subscript.</p> |
| Rich Text Editor | Bug Fix | Some lines are loaded from RTF file with extra space |
| Rich Text Editor | Bug Fix | Bullet list indent is not reset after using Ctrl+A and then deleting the existing bullet list. |
| Rich Text Editor | Bug Fix | <p>Typing 'a', 'y', 'k', 'v' on a new line is removing the applied settings from the previous paragraph.</p> <p>Notes: Resolved an issue in the XamRichTextEditor where character formatting from the previous paragraph was sometimes lost when typing certain characters into a newly inserted paragraph.</p> |

| | | |
|------------------|---------|--|
| Rich Text Editor | Bug Fix | <p>Scrollbar thumb is jumping when scrolling the editor's content using the mouse wheel.</p> <p>Notes: Resolved an issue in the XamRichTextEditor which sometimes caused 'jumpy scrolling' when scrolling with the mousewheel.</p> |
| Rich Text Editor | Bug Fix | TableCellBorderSettings won't apply to XamRichTextEditor's TableCellNodes until a column's width is manually resized. |
| Rich Text Editor | Bug Fix | List indentation is not saved nor loaded via HTMLSerializationProvider |
| Rich Text Editor | Bug Fix | <p>The editor's height is set to its specified MaxHeight when placed in a StackPanel.</p> <p>Notes: Resolved an issue in the XamRichTextEditor when the MaxHeight property was set which caused the control's height to be set to MaxHeight even when the control's contents did not required an increased height.</p> |
| Rich Text Editor | Bug Fix | An error occurs when an exported docx file is opened with MS Word 2007 |
| Rich Text Editor | Bug Fix | One of the paragraph's foreground color is wrong when importing from rtf. |
| Rich Text Editor | Bug Fix | Exporting to rtf format is not rendering a table correctly when loading in MS Word when style='text-align: justify;' is set |
| Rich Text Editor | Bug Fix | Exporting to html format is adding additional line spacing when opened in MS Word |
| Rich Text Editor | Bug Fix | Exporting html to rtf format is converting № symbol to superscripted 1 when opened in MS Word |
| Schedule | Bug Fix | Occurrence is not updated correctly if it was broken before. |
| Schedule | Bug Fix | <p>Recurrence description does not update when switching between every day and every work day</p> <p>Notes: Fixed an issue in the xamSchedule ActivityRecurrenceDialog which could result in a stale recurrence description being displayed in the dialog when switching between daily recurrence patterns.</p> |
| Schedule | Bug Fix | Resetting the ActivityItemSource is corrupting the recurrence activities after dragging |
| Schedule | Bug Fix | Changing the recurrence of an activity and dragging it after that makes it disappear |
| Tile Manager | Bug Fix | Application freezes when trying to maximize a XamTileManager's tile |

| | | |
|--------------|-------------|--|
| Tile Manager | Bug Fix | <p>When tile content is a WindowsFormsHost and the tile is scrolled out of view, the WindowsFormsHost still shows.</p> <p>Notes: Note: this fix causes a behavioral change in that when a tile that contains a WindowsFormsHost is being scrolled either completely out of view it will be rendered completely out of view. This is because it can/will obscure other controls on the forms. So instead of animating out of view (or into view) it will disappear at the beginning of the animation when it would have been scrolled off the tile area panel or reappear at the end of the animation when it would have scrolled back into the tile area.</p> |
| Timeline | Improvement | <p>Performance decreases when changing property in bound data</p> <p>Notes: An optimization was made to Timeline wherein batch updates to items in the datasource will queue a single refresh of the series, instead of invoking many refreshes.</p> |
| Tree Map | Bug Fix | <p>InvalidOperationException is thrown when treemap is inside a column with ColumnDefinition with Width="auto".</p> <p>Notes: When the xamTreeMap is placed in a Grid Column/Row with Width/Height set to Auto, the control receives Infinity as width/height. If particular size is not set, the control is restricted to the MinHeight/MinWidth set in the generic file.</p> |
| Tree Map | Bug Fix | <p>An exception is thrown when the control is placed in a ScrollViewer and vertical scrollbar is visible.</p> |
| XAML | Bug Fix | <p>ListBoxItems that contain UI elements disappear after selection</p> |
