NetAdvantage® for Silverlight 12.2 – Service Release Notes – October 2013

Accent your line-of-business RIAs with a great Office 2010 style user experience quickly and easily by using our high-performance Silverlight controls. From blazing fast data grids to a Web-based user interface that rivals the richness previously possible only on the desktop.

Installation

Downloading	[Download NetAdvantage for Silverlight here.](#)
Installation Prerequisites	Before you install NetAdvantage for Silverlight, make sure you have the following:

Prerequisite	Description
Silverlight 5	Download and Install Silverlight 5 Developer Runtime for Windows from Microsoft© [website](#).

What's Changed

Components	Product Impact	Description
Combo Editors	Bug Fix	Typing the same letter in the control makes additional horizontal scrollbar appear.
Context Menu	Breaking Change (API)	ContextMenuItem Header does not show bound data after the second time it appears Notes: Part of the ControlTemplate named "HeaderPresenter" was changed from IconContentControl to ContentPresenter type.

INFRAGISTICS
DESIGN / DEVELOP / EXPERIENCE

Context Menu	Bug Fix	TabGroupPane dropdown does not display all panes
Data Chart	Bug Fix	Column Series with OlapXAxis, within the ContentPane, is rendering with columns collapsed.
Data Chart	Improvement	TooltTip does not disappear when Busy Indicator is running. Notes: A method called HideToolTip() has been added in order to hide the tooltip on demand. The updated sample is attached as well .
Data Chart	Bug Fix	Changing the ItemsSource of the Series/Axis plotted on DateTimeAxis from less number of datapoints to a larger dataset throws an exception Notes: A scenario where temporarily invalidating the DateTimeMemberPath on the DateTime X axis was throwing an exception has been resolved.
Data Tree	Bug Fix	Nodes are being checked and then unchecked when using drag and drop Notes: A custom CheckBox template was added to fix the issue
Data Tree	Bug Fix	The control does not update its data after the second time is it updated
Data Tree	Bug Fix	There is a Binding Error when a Node enters edit mode and an ItemTemplate is defined
Data Tree	Bug Fix	Binding error appears when binding a property of the XamDataTreeNodeControl through a style
Data Tree	Bug Fix	The control does not update its data when the data is added via a button
Data Tree	Bug Fix	Not able to select the active node after calling Clear of SelectedNodes
Date Time	Bug Fix	DateTime control not showing binding results until the control is in focus Notes: Fixed an issue in XamDateTimeInput where having a binding to Date property did not update the display of the control to reflect the value provided by the binding.

Dock Manager	Bug Fix	Docking indicators do not appear at the proper location when FlowDirection = RightToLeft.	
Dock Manager	Breaking Change (API)	File Menu captions lost after tabs repositioned Notes: The Header and TabHeader properties have been changed from type String to Object to allow setting to an object that can be used within the associated template property (e.g. HeaderTemplate). Note, the sorting of the panes for the file menu dropdown is still based on the Header but now uses the ToString of the Header. The potential breaking change is just a situation where someone was reading out the value of the Header/TabHeader and expecting the property type to be of type string.	
Grid	Bug Fix	Touch scrolling is not working for the Grid part of the control	
Grid	Bug Fix	Populating an empty IEditableCollectionView causes an exception when FilterRow is enabled	
Grid	Bug Fix	DuplicateColumnKeyException is thrown if the data object has more than one indexer and AutoGenerateColumns is True	
Grid	Bug Fix	The public property Column is missing from FilterValueProxy	
Inputs	Bug Fix	The blue border disappear when moving the mouse over the xamInput control	
Outlook Calendar View	Improvement	BringIntoView method should be added to bring specific DateTime into view for XamOutlookCalendarView Notes: Added a BringIntoView method to the ScheduleControlBase and XamOutlookCalendarView classes. Also added a BringDateIntoView value to the ScheduleControlCommand enumeration so one could use the ScheduleCommandSource to invoke the method. The command expects the resolved parameter to be the DateTime to be brought into view.	
Pivot Grid	Bug Fix	Opacity rectangle is not shown for measures item when a lot of filters are added and scroll to the bottom	
Pivot Grid	Bug Fix	Slicer item is in focus when unselecting it with CTRL key and mouse. For some themes it appears that it is not selected	
Pivot Grid	Bug Fix	The MeasureListIndex property works only the first time it is set	
Ribbon	Bug Fix	XamRibbon and QAT customization window crashes	

Ribbon	Bug Fix	XamRibbon Customization Window crashes during Export	
Ribbon	Bug Fix	XamRibbonContextualTab's IsVisible Property doesn't bind.	
Tree Map	Bug Fix	Treemap is showing an error multiple times	
Compression	Bug Fix	Error when opening a saved archive that contains a specific file	
Dock Manager	Bug Fix	Closed pane not being persisted	
Gantt	Bug Fix	XamContextMenu of the xamGantt does not pick up styles defined within the Page's resources	
Grid	Bug Fix	InvalidKeyException is thrown when a Column with a key that points to a property from an inherited interface is added.	
Inputs	Bug Fix	IDataErrorInfo popup doesn't work when using XamInput controls

Notes:
Changed the default template for the xamMaskedInput and xamDateTimeInput to use a ValidationDecorator to display error information in both SL and WPF similar to how the SL TextBox displays validation error information. | |
| Inputs | Bug Fix | Value cannot be null when tab out of cell or delete content and tab out of cell

Notes:
Fixed an issue in MaskedInput where using it in XamGrid with value constraint settings that would consider null an invalid value caused an error message to be displayed when exiting edit mode on a cell containing masked input in XamGrid. | |
| Multi Column Combo | Bug Fix | When the drop down is empty during resize some visual defects appear | |
| Pie Chart | Bug Fix | All component specific properties are displayed under "Other" property group | |
| Silverlight | Bug Fix | Errors occur when building the solution of the Silverlight Source

Notes:
Source is building correctly. | |
