

# NetAdvantage<sup>®</sup> for Silverlight 13.1 – Service Release Notes – October 2013

---

Accent your line-of-business RIAs with a great Office 2010 style user experience quickly and easily by using our high-performance Silverlight controls. From blazing fast data grids to a Web-based user interface that rivals the richness previously possible only on the desktop.

## Installation

<b>Downloading</b>	<a href="#">Download NetAdvantage for Silverlight here.</a>				
<b>Installation Prerequisites</b>	<p>Before you install NetAdvantage for Silverlight, make sure you have the following:</p> <table border="1" data-bbox="394 649 1789 857"> <thead> <tr> <th data-bbox="394 649 856 706">Prerequisite</th> <th data-bbox="856 649 1789 706">Description</th> </tr> </thead> <tbody> <tr> <td data-bbox="394 706 856 857">Silverlight 5</td> <td data-bbox="856 706 1789 857">Download and Install Silverlight 5 Developer Runtime for Windows from Microsoft© <a href="#">website</a>.</td> </tr> </tbody> </table>	Prerequisite	Description	Silverlight 5	Download and Install Silverlight 5 Developer Runtime for Windows from Microsoft© <a href="#">website</a> .
Prerequisite	Description				
Silverlight 5	Download and Install Silverlight 5 Developer Runtime for Windows from Microsoft© <a href="#">website</a> .				

## What's Changed

Components	Product Impact	Description
Data Chart	Bug Fix	Column Series with OlapXAxis, within the ContentPane, is rendering with columns collapsed.
Combo Editors	Bug Fix	Typing the same letter in the control makes additional horizontal scrollbar appear.
Compression	Bug Fix	Error when opening a saved archive that contains a specific file

Context Menu	Breaking Change (API)	<p>ContextMenuItem Header does not show bound data after the second time it appears</p> <p>Notes: Part of the ControlTemplate named "HeaderPresenter" was changed from IconContentControl to ContentPresenter type.</p>
Context Menu	Bug Fix	TabGroupPane dropdown does not display all panes
Data Chart	Improvement	<p>ToolTip does not disappear when Busy Indicator is running.</p> <p>Notes: A method called HideToolTip() has been added in order to hide the tooltip on demand. The updated sample is attached as well .</p>
Data Chart	Bug Fix	<p>The first DateTime Label is not completely displayed with increased fontsize or multiple Axes on the Chart</p> <p>Notes: A scenario where increasing the axis label font size would clip some labels has been resolved.</p>
Data Chart	Bug Fix	<p>Changing the ItemsSource of the Series/Axis plotted on DateTimeAxis from less number of datapoints to a larger dataset throws an exception</p> <p>Notes: A scenario where temporarily invalidating the DateTimeMemberPath on the DateTime X axis was throwing an exception has been resolved.</p>
Data Chart	Bug Fix	<p>Setting the CategoryToolTipLayer on the StackedBarSeries causes Invalid Cast exception.</p> <p>Notes: A scenario with combining category tooltip layer with stack series (not supported) was causing an exception and has been resolved.</p>

Data Tree	Bug Fix	<p>Nodes are being checked and then unchecked when using drag and drop</p> <p>Notes: A custom CheckBox template was added to fix the issue</p>
Data Tree	Bug Fix	The control does not update its data after the second time is it updated
Data Tree	Bug Fix	There is a Binding Error when a Node enters edit mode and an ItemTemplate is defined
Data Tree	Bug Fix	Binding error appears when binding a property of the XamDataTreeNodeControl through a style
Data Tree	Bug Fix	The control does not update its data when the data is added via a button
Data Tree	Bug Fix	Not able to select the active node after calling Clear of SelectedNodes
Date Time	Bug Fix	<p>DateTime control not showing binding results until the control is in focus</p> <p>Notes: Fixed an issue in XamDateTimeInput where having a binding to Date property did not update the display of the control to reflect the value provided by the binding.</p>
Dock Manager	Bug Fix	Docking indicators do not appear at the proper location when FlowDirection = RightToLeft.
Dock Manager	Breaking Change (API)	<p>File Menu captions lost after tabs repositioned</p> <p>Notes: The Header and TabHeader properties have been changed from type String to Object to allow setting to an object that can be used within the associated template property (e.g. HeaderTemplate). Note, the sorting of the panes for the file menu dropdown is still based on the Header but now uses the ToString of the Header. The potential breaking change is just a situation where someone was reading out the value of the Header/TabHeader and expecting the property type to be of type string.</p>
Dock Manager	Bug Fix	Closed pane not being persisted
Gantt	Bug Fix	XamContextMenu of the xamGantt does not pick up styles defined within the Page's resources
Grid	Bug Fix	InvalidKeyException is thrown when a Column with a key that points to a property from an inherited interface is added.

Grid	Bug Fix	Touch scrolling is not working for the Grid part of the control
Grid	Bug Fix	Populating an empty IEditableCollectionView causes an exception when FilterRow is enabled
Grid	Bug Fix	DuplicateColumnKeyException is thrown if the data object has more than one indexer and AutoGenerateColumns is True
Grid	Bug Fix	The public property Column is missing from FilterValueProxy
Grid	Bug Fix	Cannot enter a date in the custom date filter  Notes: Fixed
Inputs	Bug Fix	IDataErrorInfo popup doesn't work when using XamInput controls  Notes: Changed the default template for the xamMaskedInput and xamDateTimeInput to use a ValidationDecorator to display error information in both SL and WPF similar to how the SL TextBox displays validation error information.
Inputs	Bug Fix	Value cannot be null when tab out of cell or delete content and tab out of cell  Notes: Fixed an issue in MaskedInput where using it in XamGrid with value constraint settings that would consider null an invalid value caused an error message to be displayed when exiting edit mode on a cell containing masked input in XamGrid.
Inputs	Bug Fix	The blue border disappear when moving the mouse over the xamInput control
Multi Column Combo	Bug Fix	When the drop down is empty during resize some visual defects appear
Outlook Calendar View	Improvement	BringIntoView method should be added to bring specific DateTime into view for XamOutlookCalendarView  Notes: Added a BringIntoView method to the ScheduleControlBase and XamOutlookCalendarView classes. Also added a BringDateIntoView value to the ScheduleControlCommand enumeration

so one could use the ScheduleCommandSource to invoke the method. The command expects the resolved parameter to be the DateTime to be brought into view.

Pivot Grid	Bug Fix	Opacity rectangle is not shown for measures item when a lot of filters are added and scroll to the bottom
Pivot Grid	Bug Fix	Slicer item is in focus when unselecting it with CTRL key and mouse. For some themes it appears that it is not selected
Pivot Grid	Bug Fix	The MeasureListIndex property works only the first time it is set
Ribbon	Bug Fix	XamRibbon and QAT customization window crashes
Ribbon	Bug Fix	XamRibbon Customization Window crashes during Export
Ribbon	Bug Fix	XamRibbonContextualTab's IsVisible Property doesn't bind.
Silverlights	Bug Fix	Errors occur when building the solution of the Silverlight Source
		Notes: Source is building correctly.
Tile Manager	Bug Fix	Maximizing the size of a tile makes it shrink
		Notes: A change was made in the tiles control's tile resizing logic to improve resizing behavior in certain complicated tile layouts with tiles spanning other tiles partially.
Tree Map	Bug Fix	Treemap is showing an error multiple times
