What's Changed

259488	DataChart	Breaking Change	Right click and drag brings up the zoom navigation To provide the developer the means to specify how the UltraDataChart should behave when dealing with right mouse button events, a new property RightButtonDefaultInteraction has been added to the control.
260649	DataChart	Bug Fix	UltradataChart throwing NullReferenceException for StackedAreaSeries
261112	DateTime Editor	Bug Fix	Editor collapses after using mousewheel
261093	Dock Manager	Bug Fix	When undocking/unpinning windows/panes they unable to be resized
262145	Dock Manager	Bug Fix	UltraExpandableGroupBox is not expanded at runtime

			<p>EditorButton icon size issues</p> <p>The issue here is that the UltraCombo is using the ImageList when considering the GetSizeOfImages methods of the editor owner. None of the other editors do this and that's why the Ultracombo was behaving differently than all of the other editors.</p> <p>So I changed UltraCombo to do what all of the other editors do and ignore the ImageList.</p> <p>Note that the problem(s) described here ONLY occur when using an ImageList. If you assign an image directly to the button.Appearance.Image without an ImageList, it works the same way as all the other editors do.</p>

			Does not scroll while using the mouse wheel when another control has focus
			Windows 10 has an option in the mouse settings called: "Scroll inactive windows when I hover over them". It defaults to On.
			If this setting is off, the tree control will not receive a MouseWheel notification unless it has focus. This is true of all controls.
			When this setting is on, and the tree gets a MouseWheel message, it will now scroll.
261996	Tree	Bug Fix	Printing Tree with footer TextLeft set throws NullReferenceException
260656	Zoom Panel	Bug Fix	Scrollbar remains even after zoom goes back to the original scale if there are controls near panel border
