--------------------	--

What's Changed

ID	Component	Product Impact	Description
273147	Appearances	Bug Fix	Cannot create class that implements AppearanceBase because of the newly added internal GetAssociatedImageList The abstract method has been removed. The AssociatedImageList property on AppearanceBase is now virtual, instead.
273079	DataChart	Bug Fix	Horizontal and Vertical lines do not render if a LinearGradientBrush is applied to the Brush of the series
273193	GanttView	Bug Fix	Cannot move the slider on the UltraGanttView in the Designer
273194	GanttView	Bug Fix	Trying to modify the TimelineSettings.PrimaryInterval and AdditionalIntervals fails
273114	Grid	Bug Fix	Error message pops up when DataType property of an unbound column is attempted to be changed on the designer. (Net5)
273121	Grid	Bug Fix	Column's ValueList property is not populated on the designer. (Net5)
273206	Grid	Bug Fix	Cell text is not fully visible when a data error is displayed.
273299	Grid	Bug Fix	Column Name in GroupBy is cut off by 1 character and top of Upper Case letters in slightly cut-off
273576	Grid	Bug Fix	Windows Server 2012 R2][Winforms][GetSystemMetricsForDpi] - EntryPointNotFoundException

273013	ListView	Bug Fix	<p>Erratic scrolling on Doubleclick on WinListView, with TabIndex set, ends up selecting another item.</p> <p>The reason this happens is that the UltraListView activates the first visible item when it gets focus. So in this scenario, the first MouseDown of the DoubleClick sets focus to the UltraListView, it activates the first item and scrolls it into view, and then the second MouseDown ends up on a different item.</p> <p>To fix this, we will no longer scroll the item into view when it is activated by a MouseDown.</p> <p>A simple way to work around the issue is to simply set an ActiveItem in the UltraListView initially - before it gets focus.</p>
273186	Schedule	Bug Fix	The UltraWinSchedule assembly has references to version 13.2 in the dialog resources
273140	TimelineView	Bug Fix	UltraTimelineView.PrimaryInterval dialog shows the read-only TimeInterval and DateInterval properties
273090	ToolTipManager	Bug Fix	<p>UltraToolTipInfo -Add Resolved Appearance Properties</p> <p>Two new methods have been added to the UltraToolTipManager:</p> <p>GetResolvedToolTipAppearance GetResolvedToolTipTitleAppearance</p> <p>So it is now possible to resolve the tooltip appearance for a specific control.</p>
273142	Tree	Bug Fix	The smart tag of the UltraTree includes links that don't work for Edit ColumnSets
273143	Tree	Bug Fix	Clearing the UltraTree.DataSource does not work via the smart tag and does not clear the ColumnSets of the tree
273159	ZoomPanel	Bug Fix	Visual Studio stops responding and restarts when ZoomPanel is deleted in the designer window.
