--------------------	--

What's Changed

ID	Component	Product Impact	Description
272392	DockManager	Bug Fix	Center-docked tabs in the UltraDockManager have an empty context menu
272185	Document Exporter	Bug Fix	<p>Grid exporter is not exporting semi-transparent images correctly</p> <p>A new property called UsePixelTransparencyForImages has been added to the UltraGridDocumentExporter. This property defaults to false.</p> <p>If you set it to true, the UltraGridDocumentExporter will apply transparency to images exported in cell ImageBackgrounds.</p> <p>However, you should be aware that this requires the Documents engine to use significantly more memory for exporting images - even if the images have no transparency.</p> <p>Also UsePixelTransparencyForImages is incompatible with ImageTransparentColor. So if you set UsePixelTransparencyForImages to true, ImageTransparentColor is ignored.</p>
271967	Excel	Bug Fix	Columns are not removed properly if there are some merged cells present.

273019	Excel	Bug Fix	TickMarkSpacing and TickLabelSpacing does not appear to have any effect in the WorksheetChart
272314	ExplorerBar	Bug Fix	NullReferenceException when right click the item in ExplorerBar
272425	ExplorerBar	Bug Fix	Explorer bar items appears large when style is OutlookNavigationPane
272822	FormattedTextEditor	Bug Fix	Cannot use Mouse Wheel Scrolling when value is within xml tags
272173	Grid	Bug Fix	<p>'Unable to update the data value' message is displayed when a dropdown cell value is updated.</p> <p>It's worth noting that this is not good practice. It doesn't make a lot of sense to use Suggest mode for dropdown list and have the potential text values of that list not be in alphabetical order.</p> <p>The Suggest functionality is implicitly making the assumption that the values are in alphabetical order it's been that way for almost 20 years and this is the first time anyone has noticed a problem.</p> <p>In any case, it's not an appropriate behavior for the grid to refuse to accept obviously-valid text, so that part is fixed and the list will now seek out an exact match and characters are removed and a partial match is found that cannot be appended, since it's the same item.</p>
272906	Grid	Bug Fix	Segoe UI font type reduce the grid performance
272671	Schedule	Bug Fix	Last Appointments slot not showing up when printing
272827	TabControl	Bug Fix	Customer Claims: Red X in UltraTabControl when displaying instances of the same form on multiple threads.
272967	WinForms	Bug Fix	Missing LoadFromBinary method from the UltraLiveTileView
