## What's Changed

ID	Component	Product Impact	Description
272038	ComboEditor	Bug Fix	<p>ArgumentException when adding the same instance to the BindingList twice when bound to UltraComboEditor/ValueList.</p> <p>Binding to a data source with duplicate items instances in the list is not a supported scenario, and will almost-certainly create strange, unexpected behaviors. For example, if you select any of the duplicate items from the UltraComboEditor and then drop it down, the first duplicate item will always be selected. It's also likely that this scenario may cause other exceptions in response to other interaction.</p> <p>But... in this case, there's no particular reason why the UltraComboEditor should raise an exception and crash the application. So the exception has been fixed.</p>
271906	DataChart	Bug Fix	Null reference exception when adding CategoryDateTimeXAxis to Series (null reference on Interval property)
