--------------------	--

What's Changed

ID	Component	Product Impact	Description
271168	CalcManager	Bug Fix	UltraCalcException is occurred if I put the custom combo(inherits UltraCombo) and UltraCalcManager to
268597	Combo	Bug Fix	UltraGridFilterUIProvider invoke incorrect resizing of UltraCombo DropDown area
270353	DayView	Bug Fix	Last time slot won't be scrolled to when dragging an appointment
270895	DockManager	Bug Fix	Error message that the "AllowDrop property is set to true but the ApartmentState of the current thread UltraDockManager.
267614	Excel	Bug Fix	NameReference.ReferencedRegion returns null on first time query
271008	ExplorerBar	Bug Fix	Context Menu appears larger
269189	FormattedTextEditor	Bug Fix	<p>There are not separate resource strings/properties for the menu item and the tooltip</p> <p>New Tool Caption Strings</p> <p>New ToolTip Strings - these are essentially the same as the original strings, but they are better named and</p>

265969	General	Bug Fix	<p>We have implemented a fix, but the real problem here is in the sample.</p> <p>This sample is assigning an ImageList to various appearance and setting the Image property on the AppearanceImageLists in this sample contain no images.</p> <p>When the control tries to get the image, it detects that Image is a string and tries to get the image by key. Then it tries to convert the "Image" property into an integer. This is causing a FormatException to occur when it tries to convert the string into an integer. The exception is caught, but it causes a FormatException and that slows down the application.</p> <p>The isl file makes a difference only because the Office2010 style libraries are using more transparent colors and thus raise the exceptions more often.</p> <p>The fix here is to use int.TryParse (which does not raise an exception when it fails) instead of IConvertible.ToInt32. This could be avoided if the application did not have Image settings that are invalid.</p> <p>It's also worth noting that the performance is only affected when the Debugger is attached.</p>
270424	Schedule	Bug Fix	UltraCalendarInfo.GetAppointmentsInRange finds non-existent occurrences out of range
269952	SpreadSheet	Bug Fix	Some culture-specific formats are not applied properly.
