--------------------	--

What's Changed

ID	Component	Product Impact	Description
271168	CalcManager	Bug Fix	UltraCalcException is occurred if I put the custom combo(inherits UltraCombo) and UltraCalcManager
268597	Combo	Bug Fix	UltraGridFilterUIProvider invoke incorrect resizing of UltraCombo DropDown area
270353	DayView	Bug Fix	Last time slot won't be scrolled to when dragging an appointment
270895	DockManager	Bug Fix	Error message that the "AllowDrop property is set to true but the ApartmentState of the current thread is not ApartmentState.Single" in UltraDockManager.
267614	Excel	Bug Fix	NameReference.ReferencedRegion returns null on first time query
271008	ExplorerBar	Bug Fix	Context Menu appears larger
			There are not separate resource strings/properties for the menu item and the tooltip
269189	FormattedTextEditor	Bug Fix	New Tool Caption Strings
			New ToolTip Strings - these are essentially the same as the original strings, but they are better named over the originals.

We have implemented a fix, but the real problem here is in the sample.

This sample is assigning an ImageList to various appearance and setting the Image property on the AppImage to display an image. But the ImageLists in this sample contain no images.

When the control tries to get the image, it detects that Image is a string and tries to get the image by index. If the image does not exist.

265969

General

Bug Fix

Then it tries to convert the "Image" property into an integer. This is causing a FormatException to occur because the string cannot be converted into an integer. The exception is caught, but it causes a FormatException and the application crashes.

The isl file makes a difference only because the Office2010 style libraries are using more transparent colors and editors to paint more often and thus raise the exceptions more often.

The fix here is to use int.TryParse (which does not raise an exception when it fails) instead of IConvertible.ToInt32 on a string. But the problem could be avoided if the application did not have Image settings that are invalid.

It's also worth noting that the performance is only affected when the Debugger is attached.
