What's Changed

ID	Component	Product Impact	Description
264083	DataChart	Bug Fix	The GetPosition method on the ChartMouseButtonEventArgs disappeared between 17.1 and 18.2
265827	Document Exporter	Bug Fix	RowSpacingBefore/RowSpacingAfter is not working when grid is exported to PDF
260953	Document Exporter	Bug Fix	Graphics.FillPie does not draw correctly in Canvas
265692	Excel	Bug Fix	Cannot load an excel file if it contains a certain named reference.
265943	Excel	Bug Fix	TextOperatorConditionalFormat does not change cell's appearance although the condition is met.
266244	Excel	Bug Fix	FormulaParseException when loading a workbook that references another workbook.
264898	Grid	Bug Fix	Width of a DateTime column changes when a new empty row is added.
265241	Grid	Bug Fix	Incorrect scroll behavior when scrolling the grid by dragging columns in RTL
260194	Pivot Grid	Improvement	Cannot update data in FlatDataSource without removing and reapplying measures.
260655	Pivot Grid	Bug Fix	Grid hang when set the datasource as a empty list

264717	Tooltip Manager	Bug Fix	FormattedTooltip doesn't render entirely with GDIPlus This is an issue with GDI Plus text rendering. As such, it can be worked around by using GDI, instead. You can do this by setting the static property: Infragistics.Win.DrawUtility.UseGDIPlusTextRendering = false However, this affects the entire application. So we have added a TextRenderingMode property to the UltraToolTipManager so that GDI Plus can be turned off for just the tooltips. Also, we have added a couple of extra pixels to the width of the tooltip when using GDI Plus.
264042	Tree	Bug Fix	TreeView OutlookExpress Scrollbar not showing up for bottom 2 rows
265139	Tree	Bug Fix	Insert method is slower adding nodes
