Introduction

With every release comes a set of release notes that reflects the state of resolved bugs and new additions (for volume release). You'll find the notes useful to help determine the resolution of existing issues from a past release and as a means of determining where to test your applications when upgrading from one version to the next.

			Notes:
			The blurriness of the RenderingControl in the cell has been fixed.
			
			But the ZoomPanel cannot scale the contained control directly. However, this could be handled using the ZoomFactorChanged event. Something like this:
			
			private void ultraZoomPanel1_ZoomFactorChanged(object sender, EventArgs e)
			{
			  var controlContainerEditor = (UltraControlContainerEditor)this.ultraGrid1.DisplayLayout.Bands[0].Columns[order ColumnKey].EditorComponent;
			  controlContainerEditor.EditingControl.Font = new Font(this.Font.FontFamily, this.Font.Size * this.ultraZoomPanel1.ZoomProperties.ZoomFactor);
			  controlContainerEditor.RenderingControl.Font = new Font(this.Font.FontFamily, this.Font.Size * this.ultraZoomPanel1.ZoomProperties.ZoomFactor);
			  this.ultraGrid1.Invalidate(true);
			}
