

### Introduction

With every release comes a set of release notes that reflects the state of resolved bugs and new additions (for volume release). You'll find the notes useful to help determine the resolution of existing issues from a past release and as a means of determining where to test your applications when upgrading from one version to the next.

### Installation

You can download this release of Infragistics Windows Forms controls from [this website](#).

## What's Changed

Issue ID	Component	Product Impact	Description
242068	Common	Bug Fix	Legend's items flicker when there is UI interaction with the chart
248160	Excel Engine	Bug Fix	Getting ArgumentOutOfRangeException error when saving the workbook
248161	Excel Engine	Bug Fix	Getting NullReferenceException error when saving the workbook
249580	Excel Engine	Bug Fix	Format of border set is cleared when deleting columns
247421	UltraDayView	Bug Fix	No horizontal scroll bar appears after adding multiple owners to the DayView or CalendarInfo
246909	UltraGanttView	Bug Fix	When clicking on the right side of a task and dragging it towards the right(next day), the task jumps to the left
247297	UltraGrid	Bug Fix	Error when exporting Grid with certain layouts to Excel using UltraGridExcelExporter
239135	UltraGrid	Bug Fix	Summaries are not calculated for group by rows that are not in view.
247669	UltraGrid	Bug Fix	There is a typo in the SetValue parameters for UltraGridCell
247677	UltraGrid	Bug Fix	Filtering using the (Blanks) or (NonBlanks) options changes to System.Object and do not work correctly
247788	UltraGrid	Bug Fix	InvalidOperationException occurs when calling DeactivateCell action in grid's Leave event
248042	UltraGrid	Bug Fix	NullReferenceException is thrown when a column is auto-resized by double-clicking the resize indicator
249439	UltraGrid	Bug Fix	Cells don't enter edit mode when grid is too small
247671	UltraOfficeNavBar	Bug Fix	DisplayStyle dropdown items in OfficeNavBar's Navigation Options cannot be changed with ResourceCustomizer
249432	UltraSchedule	Bug Fix	Print preview showing only two appointments.  Notes: In Office2007 style, each Day in the MonthViewSingle reserves space under the last appointment for a "Click To Add" button. You can see this button if you move your mouse just

under the last (third) appointment in the day on-screen.

Of course, you cannot mouse over the printout, but the control was still reserving the space. This is now fixed - the control will not reserve space for the button when printing.

Note 1: The SchedulePrintStyle.Monthly does not guarantee that all appointments in every day will be visible. It is still entirely possible to have too many appointments to fit within a single day and for some of those appointments to be omitted from the printout. There are other styles that are better suitable to printing all appointments.

Note 2: There's a property on the control called ShowClickToAddIndicator. So you could easily work around this issue by setting this property on the control being printed (the template). This is not the same control on the screen.

So to work around it, you would do something like this:

```
ultraSchedulePrintDocument1.TemplateMonthViewSingle = new UltraMonthViewSingle
{
    OwnerDisplayStyle = OwnerDisplayStyle.Separate,
    MaximumOwnersInView = 1,
    ShowClickToAddIndicator = Infragistics.Win.DefaultableBoolean.False
};
```

250154	UltraSpreadSheet	Bug Fix	Focus is lost and keyboard navigation is not possible when using Pick from dropdown list
248452	UltraToolbarsManager	Bug Fix	When content of a PopupControlContainerTool resizes in an ApplicationMenu2010, horizontal scrollbars are not automatically shown
248680	UltraToolbarsManager	Bug Fix	An error is thrown when pressing the shortcut key for the combo after showing the key tip
