What's Changed

Components	Product Impact	Description
Infragistics Excel Engine	Bug Fix	System.ArgumentException is raised upon loading Excel. Notes: Fixed an issue in the Excel library where the cell style names with some characters were not loaded correctly.
WinChart	Bug Fix	The "DataItemOver" event, which related to displaying a tooltip at appropriate location, does not get raised.
WinMaskedEdit	Bug Fix	Character validation using UltraValidator in MaskedEdit control shows slow performs.
WinGanttView	Bug Fix	The duration of the tasks is not updated in the database, when it is changed by dragging.
WinGanttView	Bug Fix	When the task progress bar is partially visible, it resizes when the form is resized.
WinGrid	Bug Fix	The unselected cells display as selected (highlighted) when a cell in the fixed column area is being dragged.
WinGrid	Bug Fix	Column auto-sizing for some values does not adjust the "CharacterCasing" property.
WinGrid	Bug Fix	Unable to resize column (dragging cell border from left to right) onto the secondary screen.

INFRAGISTICS
DESIGN / DEVELOP / EXPERIENCE

WinGrid	Bug Fix	Filter by format with currency does not work Notes: In order to handle all of the various filtering cases, the "FilterComparisonStyle" property on the UltraGridColumn/UltraGridOverride has been revamped adding a new enumeration value. This property now allows to determine how filtering is handled on the column. By default, the grid compares the actual on-screen cell text to the filter value. If it fails, the grid will call ToString() on the cell's Value and compare the raw unformatted text to the comparison operand. If either succeeds, the row will be considered a match. The "FilterComparisonStyle" property can be set to "DisplayTextOnly" or "ValueOnly", in which case only one of the comparisons will be made. Note that this property only applies to non-quantitative comparisons (StartWith, Contains, EndWith) as opposed to quantitative comparisons (Equals, Greaterthan, LessThan).
WinGrid	Bug Fix	The "BeforeRowUpdate" event raises twice when right-clicking on a row selector.
WinCombo	Bug Fix	Disabled rows are selected when scrolling through the values with the mouse wheel.
WinGridDocumentExporter	Bug Fix	An ArgumentException is raised when the exporting is cancelled and then started again with a new instance of the form, exporter and grid.
WinFormattedTextEditor	Bug Fix	Caret is visible while it is located under the scrollbar.
WinDayView	Bug Fix	The horizontal scrollbar does not appear when selecting more days (using the mouse) than what is in view.
WinTimeLineView	Bug Fix	The "Owner" object remain in memory after being removed.
WinToolbarsManager	Bug Fix	The "Help" button is not visible on the form caption with Office 2013 style.
WinToolbarsManager	Bug Fix	Maximized form appears larger than the screen size when "IsGlassSupported" property is disabled, or the style is set to Office2013.
WinToolbarsManager	Bug Fix	When the Show() method is called on a child form that has its "TopLevel" and "Office2007UICompatability" disabled, and the ribbon Style is set to "Office2013", the child form still displays its border.
WinToolbarsManager	Bug Fix	The Office 2013 Ribbon "Pager" button still remains visible when clicked at its leftmost or rightmost position.
