What's Changed

Components	Product Impact	Description
Infragistics Excel Engine	Bug Fix	An EndOfStreamException error occurs when loading an "xls" file. Notes: Fixed an issue in the Excel library where loading a file would cause an EndOfStreamException error.
Infragistics Excel Engine	New Functionality	Images fail to reload after Save/Load of a workbook. Notes: Added support for Save/Load picture fills in shapes of the Excel library when using the 2007 (.xlsx) formats.
Infragistics Excel Engine	Bug Fix	Formatting fails to restore after Save/Load of the existing excel files. Notes: Fixed an issue in the Excel library where cell formats failed being loaded correctly from the files created by 3rd party libraries.
Infragistics Excel Engine	Bug Fix	A NullReferenceException occurs when loading a workbook into memory. Notes: Fixed an error in the Excel library where a NullReferenceException would occur when loading documents containing formulas with OLE object links.

INFRAGISTICS
DESIGN / DEVELOP / EXPERIENCE

Infragistics Excel Engine	New Functionality	Conditional formatting fails to reload after Save/Load of a workbook. Notes: Added support for Save/Load of the conditional formatting in the Excel library for the Excel 2007 formats.
Infragistics Excel Engine	Bug Fix	The "DefaultRowHeight" property is not honored when using fonts with smaller size. Notes: Fixed an issue in the Excel library, in which row heights may have been incorrect in Microsoft Excel when saving a file in a Worksheet, customized with "DefaultRowHeight" property.
WinButton	Bug Fix	The Appearance Image Editor appears outside of the available screen rectangle.
AppStylist	Bug Fix	The ComboBoxTool drop down button ignores the appearance applied with AppStylist (isl) file.
WinChart	Bug Fix	Tooltip does not follow the mouse cursor when the UltraChart is inside of the docked pane.
WinComboEditor	Bug Fix	The "SelectionChangeCommitted" event is invoked instead of only the "SelectionChanged" when pressing a letter key while the drop down list is open.
WinOptionSet	Bug Fix	The state of the component was not properly updated with the value from the BindingSource.
WinGanttView	Bug Fix	The "IsWorkDay=true" configuration for a day is ignored if the primary interval is set to "hourly".
WinGanttView	Bug Fix	Dependent tasks are ignored when a constraint is set even when accounting for the dependent task would not violate the constraint.
WinGrid	Bug Fix	Formula recalculates incorrectly when the grid is grouped.
WinGrid	Bug Fix	Using "BellowCell" action on the last visible row in the band causes the application to hang.
WinGrid	Bug Fix	ToolTip fails to render Tab character spacing.
WinGrid	Bug Fix	FilterRow drop down truncates the last character of a listed item when changing the TextRenderingMode to GDI.
WinCombo	Bug Fix	Setting the "DropDownStyle" property to "DropDownList" after the form Load event, the control still allows typing into the editor. Notes:

INFRAGISTICS™ WINDOWS FORMS

			As a general rule - The DropDownList property is recommended to set once before the UltraCombo control is painted for the first time. The property is not intended to be updated dynamically at run-time. In this incident, the property was set in the form's "Shown" event, while the UltraCombo had focus and was already in edit mode. This was fixed by exiting edit mode whenever the DropDownList property is configured. However, the best practice is to set the property before the control enters edit mode.
WinGridExcelExporter	Bug Fix		Exported date time format was not persisted for the corresponding culture settings in the Excel. Notes: Fixed an issue in the Excel library where the DateTime value setting on a cell with a General format would not initialize the format, but persist culture-aware date format string.
WinGridExcelExporter	Bug Fix		An application exporting to excel with ValueList and large amount of data fails to respond. Notes: Fixed a performance bottleneck in the Excel library, which occurred when adding multiple non-contiguous regions to a WorksheetReferencesCollection. This could happen when assigning the same data validation instance to multiple cells that they do not interact with.
WinLiveTileView	Bug Fix		NullReferenceException occurs when pressing Shift+Tab
WinLiveTileView	Bug Fix		TileView designer does not open when using Progress Developer Studio For Open Edge.
WinLiveTileView	Bug Fix		Modifications made to the application bar in the ApplicationBarInitializing event such as, disabling an application button, are not enforced.
WinLiveTileView	Bug Fix		A KeyNotFoundException occurs when clicking the right mouse button, while dragging a tile with the left mouse button.
WinDropDownButton	Bug Fix		When configuring the popup item from the smart tag, the drop down menu displays only one item at a time, instead of all available items.
WinPanel	Bug Fix		When configuring AutoSize and MinimumSize properties, the control to stop responding.
WinSchedule	Bug Fix		The "Working Hours" fails to display custom working hours, which span across multiple days.
WinCalendarInfo	Bug Fix		Task manipulation from context causes incorrect positioning after saving and loading the task from xml.

INFRAGISTICS™ DESIGN / DEVELOP / EXPERIENCE

WinDayView	Bug Fix		Appointments with filled Location and slightly longer than the Timeslot interval duration, fail to show their Subject.
WinMonthViewSingle	Bug Fix		Appointments appear overlapped on the days which have holidays.
WinSchedulePrintDocument	Bug Fix		The SchedulePrintDocument displays incorrect number of months in the header area.
WinDockManager	Bug Fix		An ArgumentOutOfRangeException occurs when attempting to load a layout, which may contain panes that have been disposed.
WinDockManager	Bug Fix		The SaveAsXml method fails to save the DockableControlPane control name, when the Site property of the control is not null/Nothing.
WinToolbarsManager	Bug Fix		The Ribbon would not allow setting the DisplayMode property to "AutoHide" when AllowAutoHide property is set to "true".
WinToolbarsManager	Bug Fix		The Ribbon form caption appears clipped by contextual menu even when there is enough room to display it.
WinFormManager	Bug Fix		Title caption is not centered when IsGlassSupported property is set to "true".
WinMessageBox	Bug Fix		The text of the validation dialog for a specific string fails to wrap.
