## What's Changed

| Components                | Product Impact | Description   |
|---------------------------|----------------|---|
| WinCalendarInfo           | Bug Fix        | The last appointment in reoccurring appointments isn't added when reoccurrence is Daily and LimitedByDate   |
| WinComboEditor            | Bug Fix        | UltraCombo resizes after changing the MinimumSize's height and minimizing the form and activating it again  |
| WinComboEditor            | Bug Fix        | With AutoCompleteMode set to Suggest, mouse clicks are not fired  |
| WinDayView                | Bug Fix        | "ArgumentOutOfRangeException: Index was out of range." is thrown when selecting a day   |
| Infragistics Excel Engine | Bug Fix        | Exporting images with no background or border, results in shapes with solid borders and background<br><br>Notes:<br>Fixed an issue in the Excel library where newly created WorksheetImage instances had a fill and outline. These should have been null. |
| Infragistics Excel Engine | Bug Fix        | Argument Exception "The color used to create a WorkbookColorInfo instance must be opaque"<br><br>Notes:<br>Fixed an issue in the Excel library where an ArgumentException might occur when loading in shapes with non-opaque colors.                      |
| WinFormManager            | Bug Fix        | The "Help" button is not visible on the form caption with Office 2013 style.  |
| WinGanttView              | Bug Fix        | Duration column Format property is not applied  |

|                    |         |  |
|--------------------|---------|--|
| WinGrid            | Bug Fix | Sort Indicator is repositioned when HeaderStyle.WindowsVista is set  |
| WinLiveTileView    | Bug Fix | The TileFontSizes settings are not applied   |
| WinMonthViewSingle | Bug Fix | An additional event is being created when modifying an appointment that has a recurrence pattern.  |
| WinNumericEditor   | Bug Fix | The pasted characters get hidden partly just after pasting if the editor has specific font and font-size and the TextRenderingMode is set to GDIPlus.  |
| WinPanel           | Bug Fix | MouseWheel event is not fired with pinch gesture if the control is inside the UltraPanel control.  |
| WinRadialMenu      | Bug Fix | The cursor of the tools in the RadialMenu is does not change runtime   |
| SpellChecker       | Bug Fix | Periods at the ends of words are not handled correctly when comparing them with words in custom dictionaries that contain periods at the end.  |
| WinToolbarsManager | Bug Fix | Child form does not move by using LayoutMdi method when the form has ToolbarsManager   |
| WinToolbarsManager | Bug Fix | <p>DropDownManager class can be initialized with null dropDownControl</p> <p>Notes:<br/>A prevention fix was made to add a null check for a member that might be null in the reported scenario.</p>  |
| WinTree            | Bug Fix | Print preview is not generated when in Landscape mode and CustomSort activated   |
| WinForms           | Bug Fix | <p>Building the WinForms_Master_CLR40.sln results in an error</p> <p>Notes:<br/>The code will be shipped in a new unified solution file called Infragistics_WindowsForms.sln which will have all of the projects from the previous three separate solutions included in it and linked together via project references. BuildAssemblies_CLR40.proj has been updated to use this new solution as well.</p> |
