What's Changed

Components	Product Impact	Description
Calendar	Bug Fix	When today button is pressed the focus remains on it even though other elements are selected when using Metro and Metro Dark Theme
Calendar	Bug Fix	Missing selection borders for the current day in xamCalendar when using IG Theme
Calendar	Bug Fix	The current day is not distinguished when there is a selection with some themes
Calendar	Bug Fix	Changing the theme from IG theme to another theme leaves the CalendarDayOfWeeks unchanged
Charts	Improvement	Very slow to add a synced chart after adding 9 or 10 charts previously Notes: Performance when many charts are in a sync relationship has been improved.
Combo Editor		The list appears in the incorrect position with touchable screen
Data Cards	Bug Fix	All cards disappear after clearing the filter on the primary field when the PrintBasic theme is applied.

Data Chart	Bug Fix	<p>ArgumentException is thrown when VerticalScaleBottomElement is partly hidden and either VerticalScaleTopElement or VerticalScaleBottomElement is clicked</p> <p>Notes: A scenario where dragging a handle of a very small zoombar would cause an error has been resolved.</p>
Data Grid	Bug Fix	Reuse summary cell elements
Data Grid	Bug Fix	Cell Selection doesn't work correctly when there are super headers.
Data Grid	Bug Fix	Child LabelPresenters disappear when accessing Field's CellWidthResolved before expanding a record and ExpansionIndicatorDisplayMode is set to CheckOnDisplay
Data Grid	Bug Fix	<p>With a theme applied to the grid, a user cannot adjust the width of the last column.</p> <p>Notes: Updated scrollbars RepeatButton margins to correct the issue</p>
Data Grid	Bug Fix	Keyboard navigation doesn't work as expected when LazyLoad is used.
Data Grid	Bug Fix	RecordUpdating and RecordUpdated events are not fired when editing unbound fields
Data Grid	Bug Fix	The 'ActiveDataItem' is null when its binding is set before the DataSource's binding in XAML
Data Presenter	Bug Fix	The SummaryRecord cannot be scrolled into view on the first scroll attempt after moving the summary field.
Data Presenter	Bug Fix	Not all records are shown after changing views from datagrid to cards / carousel and then back to datagrid
Data Tree	Bug Fix	Nodes cannot be dragged when there is a 'Run' instance in the ItemTemplate of the NodeLayout
Data Tree	Bug Fix	Vertical Scrollbar position is not persisted
Data Tree	Bug Fix	Null Reference Exception is thrown when the window is maximized and the tab is changed
Date Time	Bug Fix	XamDateTimeInput changes its height when it is hovered over to display the dropdown button
Dialog Window	Bug Fix	Dialog windows behind a modal dialog window get focus when the modal appears and is moved

Dock Manager	Bug Fix	Argument Exception is thrown when clicking between content panes in DocumentContentHost when DPI settings are changed
Dock Manager	Bug Fix	IsVisibleChanged on ToolWindow fires more than twice when floating and docking a pane
Dock Manager	Bug Fix	Setting 'AllowDockingLeft' property to "False" allows the content pane to be docked left after undocking it
Dock Manager	Bug Fix	System.InvalidOperationException: A deferred show is already in progress is thrown when using DockManager through a remote session
Dock Manager	Bug Fix	StackOverflowException is thrown after a pane is added in a specific way
Dock Manager	Bug Fix	An exception is thrown when floating a pane that used to be in floating then dockable then docked state.
Donut Chart	Bug Fix	Inconsistency between Sliceltem and Slice objects in the RingSeries
Donut Chart		RingSeries' labels are displayed when there is no sufficient space for them
Excel	Bug Fix	Adding columns to HiddenColumnsCollection does not hide them
Excel	Bug Fix	Incorrect open parentheses when getting the display text for a cell using one of the built in numeric formats
Excel	Bug Fix	Part URI cannot contain a Fragment component error when loading a specific workbook
Excel	Bug Fix	Theme information is not loaded by the Workbook if there isn't an entry for the part in the rels section.
Excel	Bug Fix	A cell's border style is incorrectly resolved using the style value even though the border was explicitly set to None
Excel	Bug Fix	Auto size row height is not correct when using center across selection, cell specific fonts, borders or vertically merged text.
Excel	Bug Fix	Some table formulas are not being calculated properly and return #NUM instead of the value.
Excel Exporting	Bug Fix	Exporting large data async is not really async
Excel Exporting	New Functionality	Exported file does not take Timespan format when exporting xamDataGrid Notes: Added the TimeSpan as a support cell Value type in the Excel library.
Field Chooser	Bug Fix	Horizontal scroller in Field Chooser appears when the content has a larger width instead of

		autosizing
Formula Editor	Bug Fix	The IsEnabled property is not working
Geographic Map	Bug Fix	Exception occurs when zooming into the GeoMap (not consistent but noticeably seen with MapQuestImagery and CloudMade)
Grid	Bug Fix	Empty string is not displayed in the filter for null values of type Long and DateTime
Grid	Bug Fix	<p>Incorrect ActiveItem is returned in the SelectedRowsCollectionChanged event</p> <p>Notes: Selection is not indicative of an active element. The ActiveItem is the data item associated with the active/focused record/cell so it doesn't necessarily relate to what is selected. You can have cells/rows selected that are not the active item and you can activate a row with selecting it. The customer's assumption/expectation that the ActiveItem be set before a cell is selected is not a valid assumption. If they need that they should do some asynchronous processing of the selection event or they should use the active cell changed.</p>
Grid	Improvement	<p>Improve horizontal scrolling performance.</p> <p>Notes: The horizontal scrolling is improved as much as it can. Note, that the CellControlGenerationMode property should be set to Recycle for better performance while scrolling horizontally.</p>
Grid		Horizontal Scrolling causes the Header and Summary to jump
Grid	Bug Fix	Null Reference Exception is thrown while resizing group columns
Grid	Bug Fix	System.ComponentModel.Win32Exception is thrown when the drag handler is clicked
Grid	Bug Fix	Error message box with exception stack trace appears when resizing a GroupColumn
Grid	Bug Fix	AddNewRow functionality doesn't work correctly when using xamComboEditor as the editor in a custom column
Grid	Bug Fix	Blank area appears and it partly covers over a column which width is changed on data binding when using the Metro Dark theme

Grid	Bug Fix	FilterMenu cannot filter if the filter value is null
Masked	Bug Fix	Input values from software keyboard turns to be blank space
Month Calendar	Bug Fix	The current day is not distinguished when there is a selection with some themes
Month Calendar	Bug Fix	The seperator line for WeekNumber is doubled when using the Metro or Metro Dark theme
Month Calendar		Today button's content is not visualized during design time when using the Metro / Metro Dark / Office 2013 themes
Numeric	Bug Fix	Entered number is invisible when the carret is on the left end and screen keyboard is used
Outlook Calendar View	Bug Fix	Reccurence appointments are not displayed properly
Outlook Calendar View	Bug Fix	The header is not styled when using the Metro Dark theme
Pivot Grid	Bug Fix	PivotGrid Cell Widths appear to have random widths after collapsing / expanding the levels
		Notes: The column's width was jumping when user expand/collapse the levels
Pivot Grid	Bug Fix	Column's width is not correctly calculated when expanding dimensions.
Pivot Grid	Bug Fix	Connection to server is not closed when using AdomdProvider
Pivot Grid	Bug Fix	Exception is thrown when try to drag item from dataselector tree
Radial Menu	Bug Fix	Old value and New value of the event ValueChanged in NumericItem are exchanged
Record Filtering		The underline of the capital 'A' for "Starts with" and "Ends with" filter operators is not visible.
Ribbon	Bug Fix	ApplicationMenu location is wrong when using the Metro Dark theme
Ribbon	Bug Fix	The top line in ApplicationMenu 2007 is missing when using the Metro Dark theme
Rich Text Editor	Bug Fix	An additional row that can't be removed is added when a table is inserted in another table's cell.
Rich Text Editor	Bug Fix	Some table borders appear thicker than the rest
Rich Text Editor	Bug Fix	Some shapes and images are not shown neither as unsupported content, nor as objects.
Rich Text Editor	Bug Fix	Non positive values are accepted for start of a list in LevelDefinition

Rich Text Editor	Bug Fix	Autoscrolling is done when clicking on text which is positioned close to an image Notes: Fixed an unintended scrolling issue which occurred when clicking on text within a line containing a tall image.
Rich Text Editor	Bug Fix	Plain text clipboard support issues
Rich Text Editor	Bug Fix	InsideHorizontal and InsideVertical borders override all other borders.
Rich Text Editor	Bug Fix	Copying part of a hyperlink is pasting automatically the copied part three times
Rich Text Editor	Bug Fix	Image cropping does not work as Word or Paint
Rich Text Editor	Bug Fix	Tooltip of the hyperlink remains even though the cursor is not in the window Notes: Resolved an issue where a Hyperlink tooltip would sometimes remain displayed even after the mousepointer was moved beyond the bounds of the XamRichTextEditor
Rich Text Editor	Bug Fix	Image-only hyperlinks are not loaded from DOCX
Rich Text Editor	Bug Fix	ListLevelOverrides is not restarting the numeration of the second list when shared list template is used
Rich Text Editor	Bug Fix	Applying character format to the lists indicators of the second list is restarting its numeration although a shared list template is used
Rich Text Editor	Bug Fix	Resizing the parent table does not properly resize the nested one.
Rich Text Editor	Bug Fix	Typing in second paragraph after deleting from another paragraph results in using the wrong character settings Notes: Resolved an issue where the wrong CharacterSettings were being applied to typed text after backspacing over some formatted text, using the mouse to change the caret position to some differently formatted text and then typing some characters.
Rich Text Editor	Bug Fix	Line spacing settings are not visualized absolutely correct
Rich Text Editor	Bug Fix	Tables resize preview is offsetted to the left when TableIndent is specified

Rich Text Editor	Bug Fix	A cell that spans two or more rows can't be vertically resized
Rich Text Editor	Bug Fix	Exact instead of At Least is used as an extent rule for table's row height
Rich Text Editor		Navigation with Left+CTRL is not working properly when two text nodes are defined
Rich Text Editor	Bug Fix	CTRL+End is logically navigating the caret after the paragraph mark
Rich Text Editor	Bug Fix	Paragraph marker is not getting selected when selecting the entire line via SHFT+HOME Notes: Resolved an issue that occurred when selecting an entire paragraph by placing the caret immediately before the paragraph mark and pressing SHIFT+HOME. In this scenario the XamRichTextEditor was not selecting the paragraph mark along with the paragraph's content.
Rich Text Editor	Bug Fix	Exiting a list through backspace is breaking the encoding Notes: Resolved an issue that occurred when pressing backspace while the caret was positioned at the beginning of a bulleted List Item (i.e., immediately after the bullet and before the list item's text). In this scenario, characters typed after pressing backspace were rendered using the Symbol font.
Rich Text Editor	Bug Fix	The viewport scrolls when resizing a large document Notes: Resolved an issue that occurred when resizing a xamRichTextEditor control that caused the control's content to move randomly while the resize was in progress and the previous vertical scroll position in the document to be lost when the resize completed.
Row Summaries	Bug Fix	The vertical scrolling is very slow when having group records with summary definitions
Schedule	Bug Fix	Performance slows down when xamDayView is showing many calendars with many appointments.
Schedule	Bug Fix	The reminder combo box is not styled in all themes except MetroDark
Schedule	Bug Fix	Combo boxes for the TimeZones are missing from the Appointment Recurrence dialog
Syntax Editor	Bug Fix	Auto-casing does not occur after leaving a line with an undone edit

Syntax Editor	Bug Fix	Using SHIFT+TAB to move focus into the editor causes an outdent operator Notes: Fixed an issue in the xamSyntaxEditor when pressing SHIFT+TAB while another control has the focus. When this scenario caused the xamSyntaxEditor to receive the focus the syntax editor was incorrectly processing the SHIFT+TAB key combination to outdent the paragraph at the current caret location. The syntax editor now ignores SHIFT+TAB in this scenario.
Tab Control	Bug Fix	Close button location jumps when selecting a tab and TabStripPlacemnt is set to "Bottom"
