# What's Changed

| Components | Product Impact | Description |
|---|---|---|
| **ExcelExporting** | Bug Fix | Summaries with CalculationSettings are not exported to Excel<br><br>Notes:<br>Fixed an issue where certain summary settings were not getting exported from the DataPresenter to Excel. |
| **XamComboEditors** | Bug Fix | There is a typo in a StackPanel control's name in the Style's Template<br><br>Notes:<br>Fixed typo in combo editors in generic.xaml and all themes in SL and WPF for 12.2 onwards. |
| **XamComboEditors** | Bug Fix | The first item is selected after opening and closing the dropdown of the MultiColumnCombo and losing focus when CustomItemnsFilter is applied |
| **XamContextMenu** | Bug Fix | ContextMenu remains open after the parent element is removed from the visual tree |
| **XamDataGrid** | Bug Fix | BringRecordIntoView doesn't bring the correct record into view when parent record is fixed |
| **XamDataGrid** | Bug Fix | Validation error message appears twice when other xamDataGrid is clicked |

INFRAGISTICS
DESIGN / DEVELOP / EXPERIENCE

| | | Notes:<br>Fixed an issue in data presenter where clicking another data presenter while having a cell with invalid value and editor's InvalidValueBehavior set to display message box caused the message box to be displayed twice instead of just once. |
|---|---|---|
| **XamDataGrid** | Bug Fix | ArgumentOutOfRangeException occurs when sorting XamDataGrid |
| **XamDataPresenter** | Bug Fix | Incorrect xml namespace in DataPresenterGeneric.xaml DataPresenterGeneric_Express.xaml files that are installed with the product. |
| **XamDataPresenter** | Bug Fix | SortValueChanged is not set to true when the underlying data is changed<br><br>Notes:<br>Fixed an issue in data presenter where InitializeRecordEventArgs's SortValueChanged property was not correctly initialized in some cases. |
| **XamDataPresenter** | Bug Fix | OverflowException occurs when scrolling and selecting grid rows |
| **XamDataTree** | Bug Fix | Overriding the Equals and GetHashcode methods prevents new nodes from being created |
| **XamDataTree** | Bug Fix | Selection should not be changed if OnActiveNodeChanging is canceled |
| **XamDockManager** | Bug Fix | Floating pane maximizes incorrectly on 2nd monitor with same resolution |
| **XamDockManager** | Bug Fix | ContentPane not Maximized correctly when the TaskBar is on the left or right side and UseNonClienArea of the ToolWindow is false. |
| **XamGantt** | Bug Fix | The scheduled duration of a summary task is not properly calculated after setting only the start value of one of the sub-tasks. |
| **XamGantt** | Bug Fix | RowSelector is not visually selected when IG and Metro theme are applied |
| **XamGrid** | Bug Fix | ManagedRuntimeError is thrown after custom filter condition is grouped |
| **XamGrid** | Bug Fix | Setting the TargetTypeName for the ColumnLayout makes the application hang when coping a cell if self-reference data is used |
| **XamGrid** | Bug Fix | Group Columns are not rendered correctly when navigating using arrow keys |
| **XamGrid** | Bug Fix | ICollectionView grouping is not working correctly |
| **XamGrid** | Bug Fix | Custom Filter Dialog does not persist the Filter Value when used in Template Column |
| **XamGrid** | Bug Fix | XamGrid sorting is lost when sorting set up in code behind and new rows are added to an empty Grid |

| XamInputs | Bug Fix | IME cannot be enabled with InputMethod properties<br><br>Notes:<br>Fixed an issue MaskedInput where setting its InputMethod attached properties did not work. |
|---|---|---|
| XamRibbon | Bug Fix | Ribbon is not spanning correctly across two monitors |
| XamRibbon | Bug Fix | MenuTool does not show the text for the second hierarchical level when using HierarchicalDataTemplate |
| XamRibbon | Bug Fix | TextEditorTool's AcceptReturn Property doesn't work.<br><br>Notes:<br>Fixed an issue with the default ControlTemplate for the TextEditorTool and now the AcceptsReturn of the TextBox is bound to that of the TextEditorTool. |
| XamSchedule | Bug Fix | Binding the LogicalDayOffset to a property of the view model does not work |
| XamSchedule | Bug Fix | ShowWorkingDaysOfWeekOnly property is ignored in MonthView |
