NetAdvantage[®] for WPF Line of Business 11.2 – Service Release Notes – December 2012

Create electrifying user experiences with next generation WPF controls that deliver the high performance and rich line-of-business features.

Installation

What's Changed

Components	Product Impact	Description
XamComboEditor	Bug Fix	XamComboEditor accepts clipboard values that do not match the list of bound items
		Notes: Fixed an issue in data presenter with pasting a value that does not exist in the items source of a combo editor with LimitToList set to true.
XamComboEditor	Bug Fix	Autocomplete does not work if item's display text is in Japanese
		Notes: Fixed an issue in XamComboEditor having to do with entering Japanese via IME.
XamDataPresenter	Bug Fix	$\label{eq:linear} Intermittent \\ Index \\ Out \\ Of \\ Range \\ Exception \\ during \\ field \\ autosize \\ operation \\ exception \\ during \\ field \\ autosize \\ operation \\ during \\ field \\ field \\ during \\ field $
		Notes: Changed the VirtualizingDataRecordCellPanel's GetFieldsInView helper method such that it ensures the index from the field it is evaluating is within the valid range for the elements currently stored by the panel.

XamDataPresenter	Bug Fix	${\sf IndexOutOfRangeException}\ is\ thrown\ when\ selecting\ child\ re\ cords\ from\ different\ parents.$
XamDataPresenter	Bug Fix	Automation elements for records return incorrect data for cell values after scrolling.
		Notes:
		Updated the RecordListControl to ensure that the old Record associated with a
		RecordPresenter being recycled has its associated automation peer invalidated.
XamDataPresenter	Bug Fix	Undo command is not showing all fields after hiding them in the Field Chooser
		Notes:
		Fixed an issue in data presenter with undo operation and using field chooser's all fields
		checkbox to hide/unhide multiple fields at a time.
XamDataPresenter	Bug Fix	Underscore cannot be removed in XamDataGrid control's mask column
		Notes:
		Fixed an issue where typing '_' in a masked editor where the prompt character is also the '_' caused it to be retained even after deleting the typed in '_' characters with backspace key.
XamDataPresenter	Bug Fix	There are no notifications when export failed due to IOException in ExportAsync method
Xambatarresenter	Dug I IX	mere are no notifications when exportance due to rockeeption in ExportAsynemethod
		Notes:
		Added logic in the DataPresenterExcelExporter to catch any exceptions when calling the Save
		method of the Workbook at the end of the export when saving to a file and report the
		exception as the CancelInfo for the ExportEnded.
XamDataPresenter	Bug Fix	$\label{eq:linear} Intermittent \ Index Out Of {\sf Range Exception} \ occurs \ during field \ autosize \ operation$
		Notes:
		Changed the VirtualizingDataRecordCellPanel's GetFieldsInView helper method such that it
		ensures the index from the field it is evaluating is within the valid range for the elements currently stored by the panel.
XamDataPresenter	Bug Fix	IndexOutOfRangeException occurs when selecting child records from different parents
XamDataTree	Bug Fix	Selected style remains after selection is cleared in XamDataTree
Admodulice	Dug Tix	

AllowClose property was changed.XamEditorsBug FixNon-IME input characters do not show up until the cell is in edit modeXamEditorsBug FixIncorrect behavior when copy and paste number include minus mark in middle of the numberXamGridBug FixCalling refresh summaries after data is updated in background does not update summary total Notes: Fixed an issue with updating the summaries with the .RefreshSummaries() method on RowsManager.For Example: RowCollection = this.xamGrid.Rows; if (rowCollection.Any()) {Row row = owCollection[0]; row.Manager.RefreshSummaries(); }XamGridBug FixColumns are not moved correctly when using Immediate column moving and dropping the header over the whitespaceXamGridBug FixSetting MergeCellStyle from Column does not apply style to merge cellsXamGridBug FixAccessViolationException occurs when XamGrid containing ImageColumn is unloaded and the loaded back in the VisualTreeXamGridBug FixFilter Selection change does not update XamGrid after the first filteringXamGridBug FixTwo columns come into view in XamGrid when clicking over the bottom hidden columnXamGridBug FixTwo columns come into view in XamGrid when Cilcking over the bottom hidden columnXamGridBug FixTwo columns come into view in XamGrid when Cilcking over the bottom hidden columnXamGridBug FixTwo columns come into view in XamGrid when Cilcking over the bottom hidden columnXamGridBug FixColumnMoving indicator is not visible after an implicit style is applied on the XamGrid	XamDialogWindow	Bug Fix	XamDialogWindow is not centered properly when it doesn't have Width and Height explicitly set
Changed the ContentPane to invoke CommandManager. InvalidateRequerySuggested when th AllowClose property was changed.XamEditorsBug FixNon-IME input characters do not show up until the cell is in edit modeXamGridBug FixCalling refresh summaries after data is updated in background does not update summary to a Notes: Fixed an issue with updating the summaries with the .RefreshSummaries() method on RowsManager. For Example: RowCollection rowCollection = this.xamGrid.Rows; if (rowCollection.Any()) {Row row = owCollection[0]; row.Manager.RefreshSummaries(); }XamGridBug FixColumns are not moved correctly when using Immediate column moving and dropping the header over the whitespaceXamGridBug FixSetting MergeCellStyle from Column does not apply style to merge cells scrollbar in XamGridXamGridBug FixFilter Selection change does not update and the loaded back in the VisualTreeXamGridBug FixSetting MergeCellStyle from Column does not apply style to merge cells scrollbar in XamGridXamGridBug FixSetting MergeCellStyle from column does not apply style to merge cells correct when VisualTreeXamGridBug FixSetting MergeCellStyle from column does not apply style to merge column is unloaded and the loaded back in the VisualTreeXamGridBug FixSetting MergeCellor occurs with "Layout cycle detected" message when using the vertical scrollbar in XamGridXamGridBug FixColumnscome into view in XamGrid dontaining ImageColumn is unloaded and the loaded back in the VisualTreeXamGridBug FixColumnscome into view in XamGrid dowen correctly when editing settings contains enabled on cort	XamDockManager	Bug Fix	ContentPane close button stays disabled when disabled from a background worker
AllowClose property was changed.XamEditorsBug FixNon-IME input characters do not show up until the cell is in edit modeXamEditorsBug FixIncorrect behavior when copy and paste number include minus mark in middle of the numberXamGridBug FixCalling refresh summaries after data is updated in background does not update summary total Notes: Fixed an issue with updating the summaries with the .RefreshSummaries() method on RowsManager.For Example: RowCollection = this.xamGrid.Rows; if (rowCollection.Any()) {Row row = owCollection[0]; row.Manager.RefreshSummaries(); }XamGridBug FixColumns are not moved correctly when using Immediate column moving and dropping the header over the whitespaceXamGridBug FixSetting MergeCellStyle from Column does not apply style to merge cellsXamGridBug FixAccessViolationException occurs when XamGrid containing ImageColumn is unloaded and the loaded back in the VisualTreeXamGridBug FixFilter Selection change does not update XamGrid after the first filteringXamGridBug FixTwo columns come into view in XamGrid when clicking over the bottom hidden columnXamGridBug FixTwo columns come into view in XamGrid when Cilcking over the bottom hidden columnXamGridBug FixTwo columns come into view in XamGrid when Cilcking over the bottom hidden columnXamGridBug FixTwo columns come into view in XamGrid when Cilcking over the bottom hidden columnXamGridBug FixColumnMoving indicator is not visible after an implicit style is applied on the XamGrid			Notes:

XamGridBug FixUnhandled error occurs with "Layout cycle detected" message when using the vertical scrollbar in XamGridXamGridBug FixAccessViolationException occurs when XamGrid containing ImageColumn is unloaded and the loaded back in the VisualTreeXamGridBug FixFilter Selection change does not update XamGrid after the first filteringXamGridBug FixFilter Selection change does not update XamGrid after the first filteringXamGridBug FixCarcel control's editor display behavior doesn't work correctly when editing settings contains enabled on cell active editingXamGridBug FixTwo columns come into view in XamGrid when clicking over the bottom hidden columnXamGridBug FixColumnMoving is not working correctly when ScaleTransform is setXamGridBug FixColumnMoving indicator is not visible after an implicit style is applied on the XamGrid			
Scrollbar in XamGridXamGridBug FixAccessViolationException occurs when XamGrid containing ImageColumn is unloaded and the loaded back in the VisualTreeXamGridBug FixFilter Selection change does not update XamGrid after the first filteringXamGridBug FixXamGridBug FixXamGridBug FixXamGridBug FixXamGridBug FixXamGridBug FixXamGridBug FixXamGridBug FixImmediate ColumnMoving is not working correctly when ScaleTransform is setXamGridBug FixColumnMoving indicator is not visible after an implicit style is applied on the XamGrid	XamGrid	Bug Fix	Setting MergeCellStyle from Column does not apply style to merge cells
XamGridBug FixFilter Selection change does not update XamGrid after the first filteringXamGridBug FixXamGrid control's editor display behavior doesn't work correctly when editing settings contains enabled on cell active editingXamGridBug FixTwo columns come into view in XamGrid when clicking over the bottom hidden columnXamGridBug FixImmediate ColumnMoving is not working correctly when ScaleTransform is setXamGridBug FixColumnMoving indicator is not visible after an implicit style is applied on the XamGrid	XamGrid	Bug Fix	
XamGridBug FixXamGrid control's editor display behavior doesn't work correctly when editing settings contains enabled on cell active editingXamGridBug FixTwo columns come into view in XamGrid when clicking over the bottom hidden columnXamGridBug FixImmediate ColumnMoving is not working correctly when ScaleTransform is setXamGridBug FixColumnMoving indicator is not visible after an implicit style is applied on the XamGrid	XamGrid	Bug Fix	AccessViolationException occurs when XamGrid containing ImageColumn is unloaded and then loaded back in the VisualTree
XamGridBug FixTwo columns come into view in XamGrid when clicking over the bottom hidden columnXamGridBug FixImmediate ColumnMoving is not working correctly when ScaleTransform is setXamGridBug FixColumnMoving indicator is not visible after an implicit style is applied on the XamGrid	XamGrid	Bug Fix	Filter Selection change does not update XamGrid after the first filtering
XamGridBug FixTwo columns come into view in XamGrid when clicking over the bottom hidden columnXamGridBug FixImmediate ColumnMoving is not working correctly when ScaleTransform is setXamGridBug FixColumnMoving indicator is not visible after an implicit style is applied on the XamGrid	XamGrid	Bug Fix	
XamGrid Bug Fix ColumnMoving indicator is not visible after an implicit style is applied on the XamGrid	XamGrid	Bug Fix	č
	XamGrid	Bug Fix	Immediate ColumnMoving is not working correctly when ScaleTransform is set
	XamGrid	Bug Fix	ColumnMoving indicator is not visible after an implicit style is applied on the XamGrid
XamGrid Bug Fix Row cannot be deleted when XamGrid is in ChildWindow	XamGrid	Bug Fix	Row cannot be deleted when XamGrid is in ChildWindow

XamMaskedEditor	Bug Fix	Prompt characters get copied even with MaskMode set to IncludeLiterals when Japanese character exists
XamMaskedEditor	Bug Fix	Pending input with Japanese character moves to the end when right arrow key is pressed in XamMaskedEditor
		Notes: Fixed an issue in masked editor where IME composition in progress was being discarded when left or right arrows were pressed.
XamMultiColumnCombo	Bug Fix	Columns' headers are empty when ItemsSource of XamMultiColumnCombo is null and columns are defined in XAML code
XamMultiColumnCombo	Bug Fix	XamMultiColumnComboloses temporary focus when clicking SelectionResetButton
XamMultiColumnCombo	Bug Fix	Dropdown appears over the XamMultiColumnCombo when it is inside a Grid with RowDefintitions
XamRibbon	Bug Fix	Image is not stretched fully in QAT with specific themes
		Notes: Changed the template within the QuickAccessToolbarGroupButtonStyleKey for the Scenic theme xaml such that the Stretch="None" was removed from the AutoDisabledImage in the template.
XamRibbon	Bug Fix	Binding error occurs when the 'Theme' property of XamRibbon is set to "Office 2010Blue"
		Notes: Made some small changes to the Ribbon and ApplicationMenuPresenter templates to avoid some binding warnings in the output.
XamSchedule	Bug Fix	Cannot end edit mode and commit the changes via the keyboard
		Notes: Changed the EmbeddedTextBox used within the ActivityPresenter such that it doesn't alter the CanExecute of the commands routed through that textbox.
XamSchedule	Bug Fix	Appointments cannot be added by selecting a day in the last column and start typing

		Notes: Changed the logic that searched for a panel that could contain a given activity to treat the end time of an activity with a duration as exclusive.
XamTabControl	Bug Fix	"Recursive call to Automation Peer API is not valid" error occurs when there is a XamDataGrid as Content
		Notes: Changed the XamTabControl and TabItemEx's AutomationPeer classes such that they do not call UpdateLayout in the GetChildren implementation.
XamTextEditor	Bug Fix	Losing focus makes the XamTextEditor disappear when the 'Metro' theme is applied Notes: Fixed an issue in XamTextEditor in Metro theme where leaving the editor caused the text to disappear.
